

Geothermal Topic Announced for SBIR/STTR

Up to \$1.15 Million for Small Businesses

Geothermal Innovations to Develop New Markets

Expand current markets, utilizing geothermal energy for electricity production or direct use applications (not including ground source heat pumps). All innovations in under-utilized markets are welcome, including geographic (e.g., eastern United States), new technological applications (e.g., power storage or other ancillary services), and new revenue streams (e.g., cascading direct use).

Technology Transfer Opportunity

Enable wider use of coproduced resources by developing a product that uses electromagnetic manipulation of magnetizable oil (Fermi Lab developed patent No. 8795519) to improve current oil/gas/water separation technologies.

Funding Opportunity Issued:

November 24, 2014

Letter of Intent Due:

December 15, 2014

Application Due:

February 3, 2015
