

# Leading Edge Technology in Diesel Emissions Control

Presented by:  
AirFlow Catalyst Systems, Inc.

DEER Conference 2010  
September 29, 2010

Poster Location: **P-2**

Thomas R. Roberts  
AirFlow Catalyst Systems, Inc.  
Product Development Manager  
183 East Main St., Suite 925  
Rochester NY 14604

# Diesel Emissions Control

Emissions control is a challenge and priority for off-highway applications above ground and underground.

Significant improvements have been made with catalyst technology that allows:

- ☐ **Higher performance** (93% DPM reduction),
- ☐ **At Lower Temperatures,**
- ☐ **In limited space,**
- ☐ **At Lower costs,**
- ☐ **Retrofitting new or existing equipment,**
- ☐ **Using simplified systems that require less maintenance.**
