

Northern New Mexico Citizens' Advisory Board (NNMCAB)

A U.S. Department of Energy
Site-Specific Advisory Board (SSAB)
Chartered under the Federal Advisory
Committee Act (FACA) by the Asst. Secretary
for Environmental Management

Visit the NNMCAB's Website at: www.nnmcab.energy.gov

What are Site Specific Advisory Boards?

Site Specific Advisory Boards were developed to involve stakeholders more directly in DOE cleanup decisions. While only one Federal Advisory Committee Act-chartered EM SSAB exists, eight local site boards are chartered under the EM-SSAB umbrella charter. They are organized at the following DOE Sites: Hanford, Idaho, Los Alamos, Nevada, Oak Ridge, Paducah, Portsmouth and Savannah River.

What do the Local Site Boards do?

The local site boards provide DOE with policy information, advice, and recommendations concerning environmental restoration, waste management, and technology development activities. They provide input and recommendations on difficult and sometimes controversial national and site specific issues; such as future use, risk, management, clean-up levels, economic development, and budget prioritization activities. Since their inception, local site boards have helped establish public trust and confidence in the EM program and DOE.

What are Local Site Boards Responsibilities?

- Submitting consensus advice and recommendations to DOE on key EM issues while representing and communicating the diversity of views in their discussions.
- Keeping the public informed on key issues, upcoming decisions, and board recommendations.

DOE's obligations to the Local Site Boards include:

- Keeping the boards informed about key issues and upcoming decisions.
- Requesting recommendations well in advance of DOE deadlines.
- Considering and responding in a timely manner to all board recommendations.

NNMCAB Function & Scope

- To advise the DOE through a federally chartered formal recommendation process on environmental restoration (cleanup) and waste management activities at Los Alamos National Laboratory (LANL) and the Northern New Mexico communities impacted by past, present, and future LANL activities.

Member Responsibilities

- Attend at a minimum 50% of all Full Board Meetings.
- Be available for committee work between board meetings and participate fully in the affairs of the board.
- Review and comment on documents that come before the board/committees in a timely manner.
- Work collaboratively and respectfully with other board members.
- Act for the board or as its representative only with a majority vote of the board.
- Abide by the terms and conditions of the EM-SSAB charter and NNMCAB Bylaws.

Environmental Monitoring & Remediation

Mission Statement

The EM&R Committee will keep abreast of DOE and LANL's Environmental Restoration and Long Term Environmental Stewardship programs and plans.

- Work with DOE and LANL to provide assistance in determining priorities and the best use of limited funds and time.
- Representing the NNM CAB's position on issues pertaining to groundwater and surface water and compliance with the Order on Consent.
- The EM&R committee will also work to ensure early, ongoing community access to LANL Environmental Remediation and Stewardship information.
