

STATEMENT OF CONSIDERATIONS

REQUEST BY CUMMINS ENGINE COMPANY, INC. FOR AN ADVANCE
WAIVER OF PATENT RIGHTS UNDER DOE COOPERATIVE AGREEMENT
NO. DE-FC02-01CH11078 ENTITLED "ADVANCED NATURAL GAS
RECIPROCATING ENGINE(S)"; W(A)-02-029; CH-1110

As set out in the attached waiver petition and in subsequent discussions with DOE Patent Counsel, Cummins Engine Company, Inc. (Cummins) has requested an advance waiver of domestic and foreign patent rights for all subject inventions made under the above identified cooperative agreement by its employees and its subcontractors' employees, regardless of tier, except inventions made by subcontractors eligible to retain title to inventions pursuant to P.L. 96-517, as amended, and National Laboratories. Cummins is leading a teaming arrangement including various industrial and academic participants and the Oak Ridge National Laboratory (ORNL) to develop and evaluate advanced natural gas reciprocating engines.

Referring to item 2 in Cummin's waiver petition, the purpose of this agreement encompasses the development of advanced natural gas engine technologies and products to substantially increase base engine efficiency while improving or maintaining product cost, reliability and durability.

The work under this agreement is expected to take place over a period of about two years at a total cost of \$8,835,550. Cummins is obligated to cost share \$4,116,940, or about 50 percent of the total cost of the project.

In view of the cost sharing and other equities between Cummins and its subcontractors, it is anticipated that the parties will develop an appropriate allocation of patent rights among the participants to facilitate the expeditious development of the technology forming the subject matter of the agreement. Accordingly, DOE will waive title to all subject inventions made by Cummins' employees and its subcontractors' employees, regardless of tier, except inventions made by subcontractors eligible to retain title pursuant to P.L. 96-517, as amended, and National Laboratories, to Cummins or its subcontractors, as mutually agreed by the parties. Except as otherwise approved in writing by DOE Patent Counsel, a party's acceptance of a subcontract under this agreement, at any tier, shall constitute Cummins certification that it has provided that party with a copy of this Statement of Considerations and that party's notice to DOE that it accepts the terms and conditions of this advance waiver. Additionally, subcontractors who receive title under this waiver shall notify DOE Patent Counsel in writing of such disposition of patent rights.

Referring to items 5 - 9 of Cummin's waiver petition, Cummins has been a leading manufacturer of industrial natural gas engines since the 1960's. This, coupled with Cummins' cost sharing, clearly demonstrates the likelihood that Cummins will continue development and commercialization of the results of this agreement.

This advance waiver of the Government's rights in inventions is subject to the usual advance patent waiver and background data licensing provisions and the government license, march-in rights, and preference for U.S. industry provisions set out in 35 U.S.C. 202-204. The advance patent waiver also includes the attached U.S. Competitiveness clause (paragraph t) which requires products embodying any waived invention or produced through the use of any waived invention be manufactured substantially in the United States unless the participant can show to

the satisfaction of DOE that it is not commercially feasible to do so. The Contractor further agrees to make the above condition binding on any assignee or licensee or any entity otherwise acquiring rights to any waived invention, including subsequent assignees or licensees. Should the Contractor or other such entity receiving rights in any waived invention undergo a change in ownership amounting to a controlling interest, then the waiver, assignment, license, or other transfer of rights in the waived invention is suspended until approved in writing by DOE.

Referring to item 10 of the waiver petition, granting this waiver is not anticipated to have any adverse impact on competition in view of the variety of competing technologies utilized in natural gas engines.

Considering the foregoing, it is believed that granting this waiver will provide Petitioner with the necessary incentive to invest its resources in the commercialization of the results of the subcontract in a fashion which will make the technology available to the public in the shortest practicable time. Therefore, upon evaluation of the waiver petition and in view of the objectives and considerations set forth in 10 CFR Part 784, all of which have been considered, it is recommended that the requested waiver be granted

Thomas G. Anderson
Assistant Chief Counsel
Intellectual Property Law Division

Date: 8/14/03

Based upon the foregoing Statement of Considerations and representations in the attached waiver petition, it is determined that the interests of the United States and the general public will best be served by a waiver of patent rights of the scope described above, and therefore the waiver is granted. This waiver will not apply to any modification or extension of the contract, where through such modification or extension, the purpose, scope or cost of the contract has been substantially altered.

Transfer and Intellectual Property, GC-62

Date: 9-5-03

(t) U. S. COMPETITIVENESS

The Contractor agrees that any products embodying any waived invention or produced through the use of any waived invention will be manufactured substantially in the United States unless the Contractor can show to the satisfaction of the DOE that it is not commercially feasible to do so. In the event the DOE agrees to foreign manufacture, there will be a requirement that the Government's support of the technology be recognized in some appropriate manner, e.g., recoupment of the Government's investment, etc. The Contractor agrees that it will not license, assign or otherwise transfer any waived invention to any entity unless that entity agrees to these same requirements. Should the Contractor or other such entity receiving rights in the invention undergo a change in ownership amounting to a controlling interest, then the waiver, assignment, license, or other transfer of rights in the waived invention is suspended until approved in writing by the DOE.

WAIVER ACTION - ABSTRACT

W(A)-02-029 (CH-1110)

REQUESTOR

Cummings Engine
Company, Inc .

CONTRACT SCOPE OF WORK

Advanced Natural Gas Reciprocating
Engines

RATIONALE FOR DECISION

50 % cost sharing
