Transportation:

Under this Market Title, funding would be utilized to provide technical and administrative support for state activities and efforts related to the transition of the state fleet to alternative fuels.

Based on a review of the unknown project locations that would be funded under "Industry Incentives" and "Renewables" DOE has conditioned these Market titles pending additional project information. Based on a review of the activities that would be funded under "Buildings," "Energy Education," "Planning and Administration," and "Transportation" DOE has determined the projects that would be funded under these Market Titles will not significantly impact the human environment and they are categorically excluded from further NEPA review under CX A9 "information gathering," and CX A11 "technical advice."

NEPA PROVISION

DOE has made a conditional NEPA determination for this award, and funding for certain tasks under this award is contingent upon the final NEPA determination.

Insert the following language in the award:

You are restricted from taking any action using federal funds, which would have an adverse affect on the environment or limit the choice of reasonable alternatives prior to DOE/NNSA providing either a NEPA clearance or a final NEPA decision regarding the project.

Prohibited actions include:

Any 2012 annual appropriation activities funded under "Industry Incentives" and "Renewables" Market Titles that involve ground-breaking activities, retrofits, or equipment purchase and/or installation are conditioned pending additional NEPA review.

This restriction does not preclude you from:

Activities involving administrative activities, technical advice, education and outreach.

If you move forward with activities that are not authorized for federal funding by the DOE Contracting Officer in advance of the final NEPA decision, you are doing so at risk of not receiving federal funding and such costs may not be recognized as allowable cost share.
