Willow Creek – Granby Tap 2.4-kV Distribution Line Structure 0/3A Pole Replacement Project Grand County, Colorado

A. <u>Brief Description of Proposal</u>: Western Area Power Administration (Western) proposes to replace Structure No. 0/3A on its Willow Creek – Granby Tap 2.4 kilovolt (kV) distribution line in Grand County, Colorado. This undertaking will involve the replacement of poles of the existing wooden H-frame structure, and construction of two level landings. An existing access road will be used to allow safe passage of rubber-tired auger truck and bucket truck to Structure 0/3A.

The pole replacement process would involve moderate to severe ground disturbance; the rejected pole is lifted out of the ground using a hydraulic jack and a rubber-tired truck-mounted auger is used to clean out the hole. A rubber-tired bucket truck is used to disconnect power line equipment from the old pole and reconnect it to the new pole. Construction of a landing involves blading to create a flat level area adjacent to the structure that allows for the safe use of the large auger and bucket trucks. Construction of a landing will involve severe ground disturbance, but the area to be disturbed would be minimized to perform the pole replacement work.

B. Number and Title of the Categorical Exclusion Being Applied: (See text in 10 CFR Part 1021, Subpart D.)

B4.6. Additions and modifications to transmission facilities.

Additions or modifications to electric power transmission facilities within a previously disturbed or developed facility area. Covered activities include, but are not limited to, switchyard rock grounding upgrades, secondary containment projects, paving projects, seismic upgrading, tower modifications, load shaping projects (such as the installation and use of flywheels and battery arrays), changing insulators, and replacement of poles, circuit breakers, conductors, transformers, and crossarms.

- C. <u>Regulatory Requirements in 10 CFR 1021.410 (b)</u>: (See full text in regulation and attached checklist.)
 - 1) The proposed action fits within a class of actions listed in Appendix A or B to Subpart D.

For classes of actions listed in Appendix B, the following conditions are integral elements. To fit within a class, the proposal <u>must not</u>:

- Threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements of DOE or Executive Orders;
- Require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators), but the proposal may include categorically excluded waste storage, disposal, recovery, or treatment actions or facilities;
- Disturb hazardous substances, pollutants, contaminants, or CERCLA-excluded petroleum and natural gas products that preexist in the environment such that there would be uncontrolled or unpermitted releases;

Willow Creek – Granby Tap 2.4-kV Distribution Line Structure 0/3A Pole Replacement Project Grand County, Colorado

- Have the potential to cause significant impacts on environmentally sensitive resources. An environmentally sensitive resource is typically a resource that has been identified as needing protection through Executive Order, statute, or regulation by Federal, State, or local government, or a federally recognized Indian tribe. An action may be categorically excluded if, although sensitive resources are present, the action would not have the potential to cause significant impacts on those resources (such as construction of a building with its foundation well above a sole-source aquifer or upland surface soil removal on a site that has wetlands). Environmentally sensitive resources include, but are not limited to those listed in paragraph B. (4) (see Attachment A).
- 2) There are no extraordinary circumstances related to the proposal that may affect the significance of the environmental effects of the proposal.
- 3) The proposal is not "connected" to other actions with potentially significant impacts, is not related to other proposed actions with cumulatively significant impacts, and is not precluded by 40 CFR 1506.1 or 10 CFR 1021.211.

D. Special Stipulations Pertaining to the Proposal:

If the scope of work of this project changes, Western's Environmental Division must be contacted for additional environmental review.

This Categorical Exclusion is valid only from signature date through the end of calendar year 2012. If construction has not commenced within that time, Western's Environmental Division must be contacted for an updated environmental review prior to construction.

All equipment used must be cleaned prior to use in the area to prevent transporting of invasive plant or noxious weed seeds.

No new road construction or repairs of the existing access road are authorized. Access to the structure will occur along the existing "grassy" path between the sagebrush.

The level landings will be constructed in the minimal footprint necessary. Once the project is completed crews will leave the landings in place but rework them in order to trap water runoff and prevent erosion.

All ground disturbed areas will be reseeded upon completion of work. The seed mixture will include the following: 50% "Manchar" smooth bromegrass, 2 pure live seed (PLS) per acre and 50% "Lincoln" smooth bromegrass 2 PLS per acre, and a planting rate of four pounds of seed per acre total. If seeding fails, then the area must be reseeded.

The Forest Service will be notified prior to commencement of work.

Willow Creek – Granby Tap 2.4-kV Distribution Line Structure 0/3A Pole Replacement Project Grand County, Colorado

If any cultural materials are discovered during construction, work in the area shall halt immediately, Western and the Colorado SHPO staff shall be contacted, and the material be evaluated by an archaeologist or historian meeting the Secretary of the Interior's Professional Qualification Standards (48 FR 22716, Sept. 1983).

To minimize impacts to potentially buried cultural resources and prevent damage to access roads, operation of off-road equipment will not be permitted during periods of heavy rains, when soils are wet, or when excessive soil damage may occur due to unsuitable operating conditions. No construction or routine maintenance activities shall be performed during periods when the soil is too wet to adequately support construction equipment. If equipment creates ruts in excess of 6 inches deep, the soil shall be deemed too wet to adequately support construction equipment.

Western shall exercise care to preserve the natural landscape and shall conduct this construction operation to prevent any unnecessary destruction, scarring, or defacing of the natural surroundings in the project vicinity. Except where clearing is required for approved construction roads, or excavation operations, vegetation shall be preserved and shall be protected from damage by Western's construction operations and equipment.

E. <u>Determination:</u> Based on my review of information provided to me and in my possession concerning the proposed action, I determined that the proposed action fits within the specified class of actions, the other regulatory requirements set forth above are met, and the proposed action is categorically excluded from requirements for an EA or an EIS.

Date: 9/20/12

ATTACHMENT A

Conditions That Are Integral Elements of the Classes of Actions in Appendix B That Apply to This Proposal

Checklist for Categorical Exclusion Determination, revised Nov. 2011

(b)(1) The proposal fits within a class of actions that is listed in appendix B to subpart D. (b)(2) There are no extraordinary circumstances related to the proposal that may affect the significance of the environmental effects of the proposal. Extraordinary circumstances are unique situations presented by specific proposals, including, but not limited to, scientific controversy about the environmental effects of the proposal; uncertain effects or effects involving unique or unknown risks; and unresolved conflicts concerning alternate uses of available resources. (b)(3) The proposal has not been segmented to meet the definition of a categorical exclusion. Segmentation can occur when a proposal is broken down into small parts in order to avoid the appearance of significance of the total action. The scope of a proposal must include the consideration of connected and cumulative actions, that is, the proposal is not connected to other actions with potentially significant impacts (40 CFR 1508.25(a)(1)), is not related to other actions with individually insignificant but cumulatively significant impacts (40 CFR 1508.27(b)(7)), and is not precluded by 40 CFR 1506.1 or § 1021.211 of this part concerning limitations on actions during EIS preparation. B. Conditions that are Integral Elements of the Classes of Actions in Appendix B. (1) Threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety and health, or similar requirements of DOE or Executive Orders. (2) Require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators), but the proposal may include categorically excluded waste storage, disposal, recovery, or treatment actions or facilities; (3) Disturb hazardous substances, pollutants, contaminants, or CERCLA-excluded petroleum and natural gas products that preexist in the environment such that there would be uncontrolled or unpermitted releases; (4) Have the potential to cause significant im	Application of Categorical Exclusions (1021.410)	Disagree	Agree	Unknown
(b)(2) There are no extraordinary circumstances related to the proposal that may affect the significance of the environmental effects of the proposal. Extraordinary circumstances are unique situations presented by specific proposals, including, but not limited to, scientific controversy about the environmental effects of the proposal, uncertain effects or effects involving unique or unknown risks; and unresolved conflicts concerning alternate uses of available resources. (b)(3) The proposal has not been segmented to meet the definition of a categorical exclusion. Segmentation can occur when a proposal is broken down into small parts in order to avoid the appearance of significance of the total action. The scope of a proposal must include the consideration of connected and cumulative actions, that is, the proposal is not connected to other actions with potentially significant impacts (40 CFR 1508.25(a)(1)), is not related to other actions with individually insignificant but cumulatively significant impacts (40 CFR 1508.27(b)(7)), and is not precluded by 40 CFR 1506.1 or § 1021.211 of this part concerning limitations on actions during EIS preparation. B. Conditions that are Integral Elements of the Classes of Actions in Appendix B. (1) Threaten a violation of applicable statutory, regulatory, or permit requirements of DOE or Executive Orders. (2) Require siting and construction or major expansion of waste storage, disposal, recovery, or treatment actions or facilities; (3) Disturb hazardous substances, pollutants, contaminants, or CERCLA-excluded petroleum and natural gas products that preexist in the environment such that there would be uncontrolled or unpermitted releases; (4) Have the potential to cause significant impacts on environmentally sensitive resources. An environmentally			X	
proposal that may affect the significance of the environmental effects of the proposal. Extraordinary circumstances are unique situations presented by specific proposals, including, but not limited to, scientific controversy about the environmental effects of the proposal; uncertain effects or effects involving unique or unknown risks; and unresolved conflicts concerning alternate uses of available resources. (b)(3) The proposal has not been segmented to meet the definition of a categorical exclusion. Segmentation can occur when a proposal is broken down into small parts in order to avoid the appearance of significance of the total action. The scope of a proposal must include the consideration of connected and cumulative actions, that is, the proposal is not connected to other actions with potentially significant impacts (40 CFR 1508.25(a)(1)), is not related to other actions with individually insignificant but cumulatively significant impacts (40 CFR 1508.27(b)(7)), and is not precluded by 40 CFR 1506.1 or § 1021.211 of this part concerning limitations on actions during EIS preparation. B. Conditions that are Integral Elements of the Classes of Actions in Appendix B. (1) Threaten a violation of applicable statutory, regulatory, or permit requirements of DOE or Executive Orders. (2) Require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators), but the proposal may include categorically excluded waste storage, disposal, recovery, or treatment actions or facilities; (3) Disturb hazardous substances, pollutants, contaminants, or CERCLA-excluded petroleum and natural gas products that preexist in the environment such that there would be uncontrolled or unpermitted releases; (4) Have the potential to cause significant impacts on environmentally	appendix B to subpart D.			
effects of the proposal. Extraordinary circumstances are unique situations presented by specific proposals, including, but not limited to, scientific controversy about the environmental effects of the proposal; uncertain effects or effects involving unique or unknown risks; and unresolved conflicts concerning alternate uses of available resources. (b)(3) The proposal has not been segmented to meet the definition of a categorical exclusion. Segmentation can occur when a proposal is broken down into small parts in order to avoid the appearance of significance of the total action. The scope of a proposal must include the consideration of connected and cumulative actions, that is, the proposal is not connected to other actions with potentially significant impacts (40 CFR 1508.25(a)(1)), is not related to other actions with individually insignificant but cumulatively significant impacts (40 CFR 1508.27(b)(7)), and is not precluded by 40 CFR 1506.1 or § 1021.211 of this part concerning limitations on actions during EIS preparation. B. Conditions that are Integral Elements of the Classes of Actions in Appendix B. (1) Threaten a violation of applicable statutory, regulatory, or permit requirements of DOE or Executive Orders. (2) Require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators), but the proposal may include categorically excluded waste storage, disposal, recovery, or treatment actions or facilities; (3) Disturb hazardous substances, pollutants, contaminants, or CERCLA-excluded petroleum and natural gas products that preexist in the environment such that there would be uncontrolled or unpermitted releases; (4) Have the potential to cause significant impacts on environmentally sensitive resources. identified as needing protection through Executive Order, statue, or regulation by Federal, state, or local government,	-	
or a federally recognized Indian tribe. An action may be categorically excluded if, although sensitive resources are	Tempo Portion Control of the Control	
present, the action would not have the potential to cause	44mm44mm	
significant impacts on those resources (such as construction	1	
of a building with its foundation well above a sole-source	.]	
aquifer or upland surface soil removal on a site that has		
wetlands). Environmentally sensitive resources include, but	1	
are not limited to:		
(i) Property (such as sites, buildings, structures, and	X	
objects) of historic, archaeological, or architectural	7	
significance designated by a Federal, state, or local		
government, or property determined to be eligible for	***************************************	
listing on the National Register of Historic Places;	37	
(ii) Federally-listed threatened or endangered species or	X	
their habitat (including critical habitat) or Federally-	unaverse e e e e e e e e e e e e e e e e e e	
proposed or candidate species or their habitat	-	
(Endangered Species Act); state-listed or state-proposed		
endangered or threatened species or their habitat;		
Federally-protected marine mammals and Essential Fish		
Habitat (Marine Mammal Protection Act; Magnuson- Stevens Fishery Conservation and Management Act);		
and otherwise Federally-protected species (such as		
under the Bald and Golden Eagle Protection Act or the		
Migratory Bird Treaty Act);		
(iii) Floodplains and wetlands (as defined in 10 CFR 1022.4,	X	
—Compliance with Floodplain and Wetland	1	
Environmental Review Requirements: "Definitions," or		
its successor);		, i
(iv) Areas having a special designation such as Federally-	X	
and state-designated wilderness areas, national parks,		
national monuments, national natural landmarks, wild		
and scenic rivers, state and Federal wildlife refuges,		
scenic areas (such as National Scenic and Historic Trails	49	***************************************
or National Scenic Areas), and marine sanctuaries;		
(v) Prime or unique farmland, or other farmland of	X	
statewide or local importance, as defined at 7 CFR		***************************************
658.2(a), —Farmland Protection Policy Act:	The state of the s	THE STATE OF THE S
Definitions, or its successor;		
(vi) Special sources of water (such as sole-source aquifers,	X	
wellhead protection areas, and other water sources that		
are vital in a region); and		
(vii) Tundra, coral reefs, or rain forests; or	X
