**Subject:** Request for Intervenor Status - Northern Pass Transmission, LLC

Dear Mr. Lawrence,

I write you to request status as an intervenor relative to the Northern Pass Project. I have opposed the Northern Pass Project for over two years. It is designed to run through my backyard. Initially, I thought that it was wrong to fight a project that would provide needed electricity to residents of Massachusetts and Connecticut. I then learned that ISO New England has categorized the Northern Pass Project as a project not needed for system reliability, but rather it is a "for profit" merchant funded project. I further learned that it is not necessary to string the power lines on over 1,500 steel towers for 180 miles through the heart of New Hampshire, but rather this transmission line could easily be buried in the already softened shoulders of our highways. There are a multitude of reasons to oppose this poorly planned project whereby the major intent is to line the pockets of Northeast Utilities' investors; therefore, I find it necessary to request intervenor status.

Thank you,  
Michael Marino
