SUPPLEMENTARY INFORMATION:

The information collected under the requirements of FERC-515 "Hydropower Licensing: Declaration of Intention" (OMB No. 1902-0079) is used by the Commission to implement the statutory provisions of Part I, Sections 23(b) of the Federal Power Act 16 U.S.C. 817. Section 23(b) authorized the Commission to make a determination as to whether it has jurisdiction over a proposed hydroelectric project. Section 23(b) also requires that any person intending to construct project works on a navigable commerce clause water must file a declaration of their intention with the Commission. If the Commission finds the proposed project will have an impact on "interstate or foreign commerce", then the person intending to construct the project must obtain a Commission license or exemption before starting construction. Such sites are generally on streams defined as U.S. navigation waters, and over which the Commission has jurisdiction under its authority to regulate foreign and interstate commerce. The information is collected in the form of a written application, declaring the applicant's intent and used by Commission staff to research the jurisdictional aspects of the project. This research includes examining maps and land ownership records to establish whether or not there is Federal jurisdiction over the lands and waters affected by the project. A finding of non-jurisdictional by the Commission eliminates a substantial paperwork burden for the applicant who might otherwise have to file for a license or exemption application. The Commission implements these filing requirements in the Code of Federal Regulations (CFR) under 18 CFR part 24.

Action: The Commission is requesting a three-year extension of the current expiration date, with no changes to the existing collection of data.

Burden Statement: Public reporting burden for this collection is estimated as:
