**Re: Cameron LNG, LLC  
DOE/FE Order No. 3059  
FE Docket No. 11-145-LNG  
Semi-Annual Report**

Dear Ms. Caudillo:

On January 17, 2012, in DOE/FE Order No. 3059, the U.S. Department of Energy, Office of Fossil Energy, granted to Cameron LNG, LLC ("Cameron LNG") a long-term, multi-contract authorization to export liquefied natural gas ("LNG") to Free Trade Agreement nations. One of the conditions of that authorization is that Cameron LNG file semi-annual written reports (on or before April 1 and October 1 of each year) describing the progress of the planned liquefaction facility from which Cameron LNG will export LNG. Cameron LNG hereby submits the first such semi-annual report.

Cameron LNG is currently engaged in project development activities. These include: (i) engineering and design of the proposed liquefaction facilities; and (ii) preparation of information that will be submitted to the Federal Energy Regulatory Commission ("FERC") and other agencies as part of the project review and approval process. Cameron LNG is also presently engaged in negotiation of long-term commercial contracts with potential customers related to the new project facilities. Cameron LNG plans to commence the FERC pre-filing process for the proposed liquefaction facilities in the second quarter of 2012. Cameron LNG estimates that the project will begin commercial operations in late 2016 or early 2017.

Please contact me with any questions regarding this filing.

Respectfully submitted,

/s/ William D. Rapp
