Subject: National Interest Energy Transmission Corridors (NIETC"s)
Date: Wednesday, October 01, 2014 1:01:38 PM

NOTE: I am sending this on behalf of my neighbor who does not have a computer.

Therefore, there will be a duplicate e-mail address.

Dear Sir:

I am opposed to the establishment of NIETC's for the following reasons:

- 1) The easements are a burdon to farmers and land-owners near the line. No compensaton can cover all the real losses and punitive losses the owners would suffer.
- 2) I believe that condemning private property in a state for ransmission lines transporting electricity to another state is a violation of private property ownership.
- 3) The Eastern states should utilize wind resources located much closer -- offshore. This would eliminate the need for hundreds of miles of harmful and costly transmission lines through productive, privately-owned, farmland.
- 4) Renewable energy should be used within the region it is produced. The economy in these regions would benefit rather than exporting it to another region.

Finally, I believe that NIETC's are a gross violation of the state's rights to regulate transmission lines.

I urge you to consider all these reasons and do not establish any NIETC's in our state, please.

Thank you,

Alfred and Edith Talley
