**Subject:** FE Docket No. 14-96-LNG  
**Auto forwarded by a Rule**

To Whom It May Concern,

I am writing this letter with regards to the Alaska LNG project and in particular the application for authorization to export LNG by vessel from a proposed Liquefaction Facility in the Nikiski area of Alaska.

As a lifelong Alaskan I am imploring your agency to review this application and provide a favorable **APPROVAL** of it. The benefits of this project and the building of this pipeline and the facilities to handle this gas would be a tremendous boost to not just Alaska, but to the American economy as well. A few points to note are:

1. 15,000 NEW construction jobs and over 1,000 operations jobs once completed.
2. Decades of instate natural gas for Alaskan homes and businesses. And with remote villages and the Eskimos / Natives that reside there that struggle every year to survive via heating oil, this gas would help them immensely.
3. Abundant natural gas resources on the North Slope of Alaska support the 30-year export term and the long-term needs of Alaskans for domestic use.
4. This Alaska LNG would provide benefits to America as a whole across the USA

In that Alaska is distinct from the lower 48 this application should not be subject to DOE's existing Order of Precedence for Processing Non-FTA LNG export applications nor should it be subject to any new procedures adopted as a result of DOE's proposed procedural change for processing Non-FTA LNG export applications. And additionally, the existing Presidential Finding concerning Alaska Natural Gas is valid and applicable to the Alaska LNG Project.

Thank you for your attention to this matter and I am thanking you in advance for your favorable review, findings and passage of this application.
