Subject: Motion to Intervene, docket 14-179-LNG
Date: Monday, February 09, 2015 3:03:44 PM

I'm writing to urgently request that the comment period for the LNG export proposal be prolonged and that more opportunities for public feedback be offered before this critical decision is made. This is an issue of deep concern to many of us in Massachusetts.

Please intervene in these proceedings so that the larger issues of methane and other greenhouse gas emissions that accompany the transport of LNG can be weighed against the interests of the companies who have put this proposal forward.

Thank you,
Andra Rose
