**Date:** Saturday, February 07, 2015 8:12:23 AM

---

The present rush to export LNG is ill-conceived and dangerous in this time of Climate Crisis. Given the criticality of trying to reduce emissions of both CO2 and methane any efforts to produce and export natural gas endangers the health and welfare of the citizens of the United States and future generations. The science on climate change is unquestionable. No "public good" is served by these exports.
