Subject: FE Docket No. 14-179-LNG
Date: Monday, February 09, 2015 3:15:24 PM

The export of LNG is not in the public interest. It will serve to increase the price locally. More drilling for natural gas is detrimental to the environment, further exacerbating climate change. Also many of these pipelines were built using a certificate of public good, meaning property may have been taken by eminent domain. The taking of property from an individual is a big deal, the use of this property should be restricted to uses that promote the public good. Exporting LNG does not serve the public, it serves only to make gas producers and pipeline owners more money. Please do not approve this change. Thank you for your consideration.

Sincerely,

Erin Jaworski
