Subject: Motion to Intervene docket 14-179-LNG
Date: Monday, February 09, 2015 3:15:57 PM

Dear Larine Moore and the US DOE,

Please extend the comment period for the Liquid Natural Gas export proposal. This is a VERY important issue and many of the public citizens in our area did not have enough opportunity to comment.

I am concerned about methane and other greenhouse gas emissions that accompany LNG transport. Greenhouse gases are killing our air, our soil, and our future, and I urge you to intervene in the proceedings to deal with these larger issues.

Thank you,

Sarah Partan
