RE: Support for the Plains & Eastern Clean Line

Dear Secretary Moniz,

Hubbell Power Systems Inc. is in support of Clean Line Energy's plan to interconnect strategic regions of our nation's transmission grid with projects that will deliver low cost, clean, renewable energy to regions that need this source of energy. As a US-based manufacturer of high voltage transmission line components, infrastructure projects like the Plains & Eastern Clean Line project create much needed US-based manufacturing jobs, many of which could be located within the regions that directly benefit from the project (in the case of Hubbell). Hubbell encourages the Department of Energy to provide the regulatory approvals necessary to make the Plains & Eastern Clean Line project a key component to our nation's transmission infrastructure.

Sincerely,

A handwritten signature in cursive script, appearing to read "Ken H. Carlson".

Ken H. Carlson
