

5/19/2015

The Honorable Ernest Moniz  
Secretary of Energy  
U.S. Department of Energy  
Office of Electricity Delivery and Energy Reliability (OE-20), 1222 Program  
1000 Independence Avenue, S.W.  
Washington, DC 20585

Dear Secretary Moniz,

I am writing to express support for the Plains & Eastern Clean Line and to urge the Department of Energy and Southwestern Power Administration to participate in the proposed project.

While the U.S. has some of the best renewable resources in the world, there is a demand for transmission infrastructure to connect the best wind resources, which are located predominantly in remote areas, to distant cities and communities with a demand for low-cost, clean energy.

The Plains & Eastern Clean Line will address the increasing demand for interregional transmission capacity to move low-cost, clean power from the wind-rich central United States to the Mid-South and Southeast. It will stimulate economic development, create jobs, expand interregional transmission capacity, and improve system reliability. The Plains & Eastern Clean Line will enable billions of dollars in new investments, generate millions of dollars in revenues for counties and local communities annually, and create thousands of jobs.

The Plains & Eastern Clean Line is a much-needed infrastructure project for the public use and benefit. Please stand up for our future and support the Plains & Eastern Clean Line.

Washington, DC 20585

Dear Secretary Moniz,

I am writing to express support for the Plains & Eastern Clean Line and to urge the Department of Energy and Southwestern Power Administration to participate in the proposed project.

While the U.S. has some of the best renewable resources in the world, there is a demand for transmission infrastructure to connect the best wind resources, which are located predominantly in remote areas, to distant cities and communities with a demand for low-cost, clean energy.

The Plains & Eastern Clean Line will address the increasing demand for interregional transmission capacity to move low-cost, clean power from the wind-rich central United States to the Mid-South and Southeast. It will stimulate economic development, create jobs, expand interregional transmission capacity, and improve system reliability. The Plains & Eastern Clean Line will enable billions of dollars in new investments, generate millions of dollars in revenues for counties and local communities annually, and create thousands of jobs.

The Plains & Eastern Clean Line is a much-needed infrastructure project for the public use and benefit. Please stand up for our future and support the Plains & Eastern Clean Line.
