## General Comment

I would like to state that as a land owner affected by the power lines that I am against the construction of such an eye sore and see very little benefit to the state of Arkansas. I am also against the confiscation of private property and the impact it will have on property values, wildlife habitat, clearing of trees etc.

The only positive I can see are temporary jobs for some local Arkansans. So we are trading some temporary jobs for permanent ugly, land devaluing, unhealthy high voltage electric lines. Not a good trade.

We have already endured natural gas drilling and multiple pipelines running through our property. Please don't allow this permanent and ugly construction to ruin the natural beauty of Arkansas for the benefit of a power company located in another state.
