FAQs

- 1) Import prices are "landed" which is the commodity price plus transportation to the US terminal. They do NOT include regassification. It DOES include off-loading.
- 2) The data are provided by importers and exporters as a condition of their authorizations (which are issued by this office). It is reported as filed, after DOE review and any subsequent revisions by importers and exporters.
- 3) Spot cargos [S] are only identified for 2006 and later years. Prior to 2006, spot cargos could be included in either long-term or short-term types.
- 4) Short-term imports or exports are those cargos imported or exported under a company's short-term or "blanket" authorization. This type of authorization covers supply contracts with terms up to 2 years, including spot cargos. The authorization is not based on a specific supply contract but covers all of the importer's short-term supply deals. DOE does not have copies of those contracts and they are not filed with the applications.
- 5) Long-term imports or exports are those cargos imported or exported under a company's long-term authorization. This type of authorization is tied to one specific supply contract with a term of more than two years. Redacted copies of the contracts are available on our website (please see below).
- 6) Authorization holders are required to file volume data in thousand cubic feet (Mcf). Therefore, data collected does not necessarily include equivalent amounts of energy, measured in million British thermal units (MMBtu).
- 7) Prices for exports from Kenai, Alaska are "delivered." This is the commodity price plus transportation to the receiving terminal in the destination country.
- 8) Prices for all other LNG exports and re-exports are the prices at the point of export, also known as FOB (free on board).
