Renewable Energy Technologies

Sandia **VISION**

**Helping our nation
secure a peaceful
and free world
through technology.**

Sandia is a multiprogram laboratory operated by Sandia Corporation, a Lockheed Martin Company, for the United States Department of Energy under contract DE-AC04-94AL85000.

Where is Sandia National Labs?

- New Mexico
- California

- Nevada
- Hawaii
- Texas

Sandia addresses the surety (safety, security & reliability) of critical infrastructures

Communications

DOE's Tribal Energy Program Tribal Energy Program

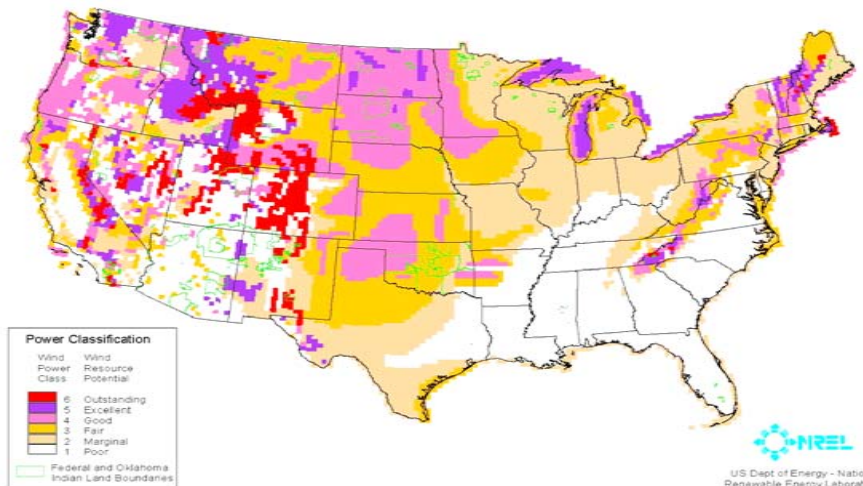

Sandia & NREL Provide Information and Technical Assistance

Technical Assistance

- Expert Advise
- Models and Tools
- Resource Maps

Information and Support

- Regional Workshops
- Program Brochure
- Tribal Energy Website
- Guide for Tribal Energy Development (Under development)

Education Program

Student Internships

Three summer interns
sponsored (2003, 2004)

One summer intern
sponsored 2005

Year-round interns sponsored
(2002-2005)

2005 Students

Tanya Martinez

Debby Tewa

Jennifer Coots

2005 Student Interns

Sandia's current technical assistance to tribes

Sandia provides technical assistance for the DOE Tribal Lands Program awardees.

- Continued support of an ecotourism development (CA-Ramona Band of Cahuilla).
- Partnership with Navajo Nation – Navajo Tribal Utility Authority NTUA Wind Feasibility Study

Albuquerque's Southwestern Indian Polytechnic Institute (SIPI) designed & installed photovoltaic, wind and solar hot water systems to educate and train Native American students in renewable energy technology.

- With the students' assistance, SIPI operates and maintains the systems.

Propane generator will be used as a back-up energy source for the Ramona Band's micro-grid hybrid system.

Tribal Energy Website
www.eere.energy.gov/tribalenergy

DOE/Sandia's technical assistance to the Navajo Nation through NTUA's Solar Program

- Support NTUA as a Leader in Rural Solar Electrification
- Assist NTUA Solar Program Coordinator to create a sustainable program
- Convey NTUA's success in solar to others, including the Department of Energy

DOE, Sandia and Navajo Nation signed an MOU for collaboration and technology transfer for the Navajo Nation, which emphasizes energy, environment, education, economic development, communication

NTUA's Technical Changes

..1993.....1999-2001.....2002-2003.....2003-2004.....

240-260 Watt

640 Watt

Phase I 880 Watt Hybrid

Phase II 880 Watt Hybrid

Business potential realized

Standardization achieved

Battery bank powered by hybrid design

Economic Development: Units assembled on Navajo Nation

The Solar Way: Photovoltaics On Indian Lands Published At Sandia

The full-color, 60-page document illustrates the myriad uses of PV on tribal lands throughout the United States.

The book uses the Seven Generations philosophy to come to organize the material.

- Caring for the earth and things on it, and living as sovereign people for Seven Generations

The book is intended to help tribes make informed decisions about photovoltaics.

- With extensive contacts listed, tribes can network and also conveniently seek technical assistance as they move forward with solar electricity projects.
