

Red Rock, New Mexico

Green Building

How the Navajo Nation can Address Renewable Energy
Development at the Local Level

Gepetta S. Billie

Graduate Intern, Tribal Energy Program
Master's Candidate, Community & Regional Planning
University of New Mexico

Introduction

Statement of Need

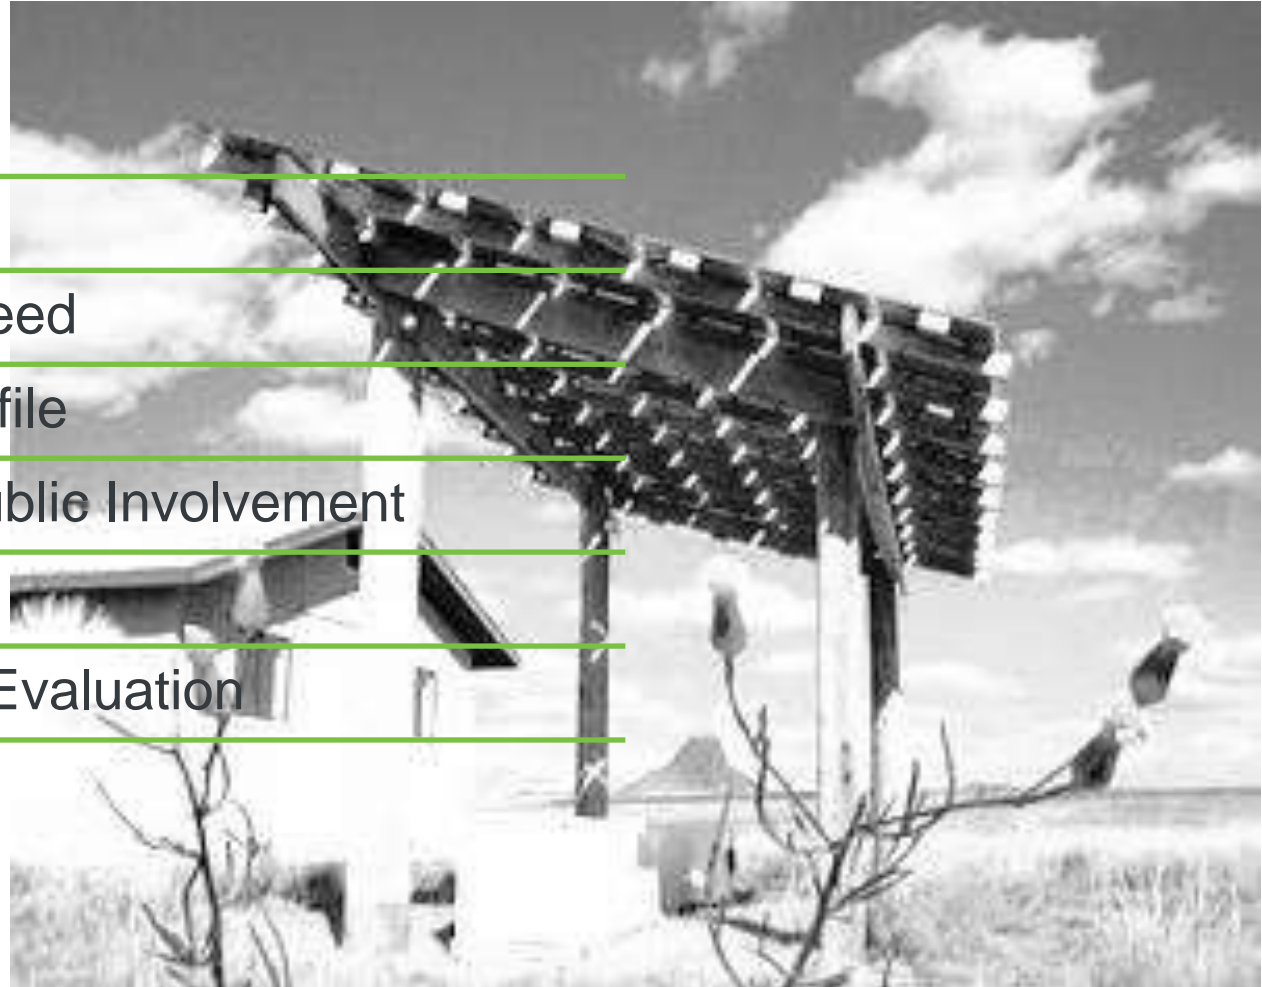

Community Profile

Work Plan & Public Involvement

Implementation

Assessment & Evaluation

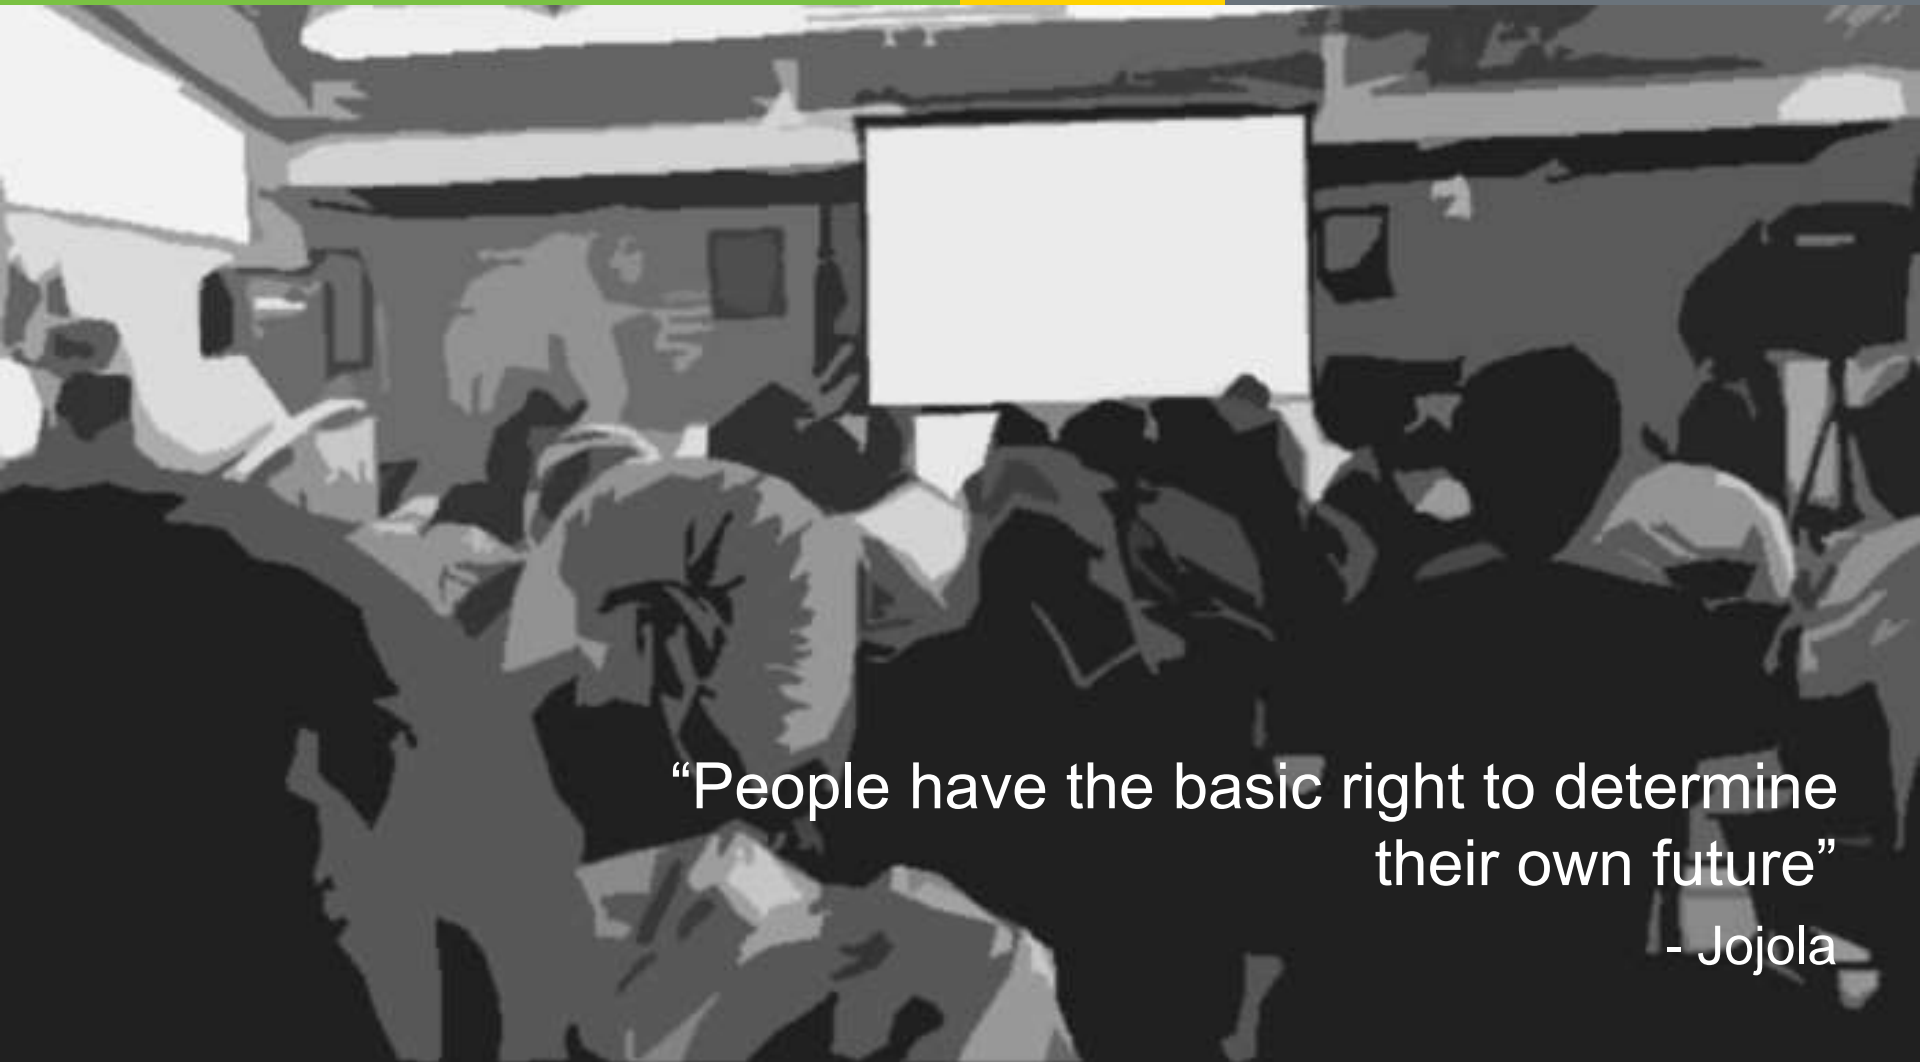

Conclusion

Who am I?

Why am I doing this?

“People have the basic right to determine
their own future”

- Jojola

Need for Local Planning

Addressing RE
Development at the
Local Level

What are our Current
Practices

- Energy Use
- Population & Consumption
- Climate Change
- Housing

BIG QUESTION:
Where do we start?

What Resources are
Most Feasible to
Develop?

- Solar
- Wind

Housing

Do-able

Empowering

Chapter Certification

Self-defined Vision

Custom Planning

Green Building

What specific activities need to be done to implement?

Break down the Planning Process

Sustainability

Sustainability Planning

Indigenous Planning

Break down Planning Tools

Define Green Building

Sustainable Design Techniques

Facilitation

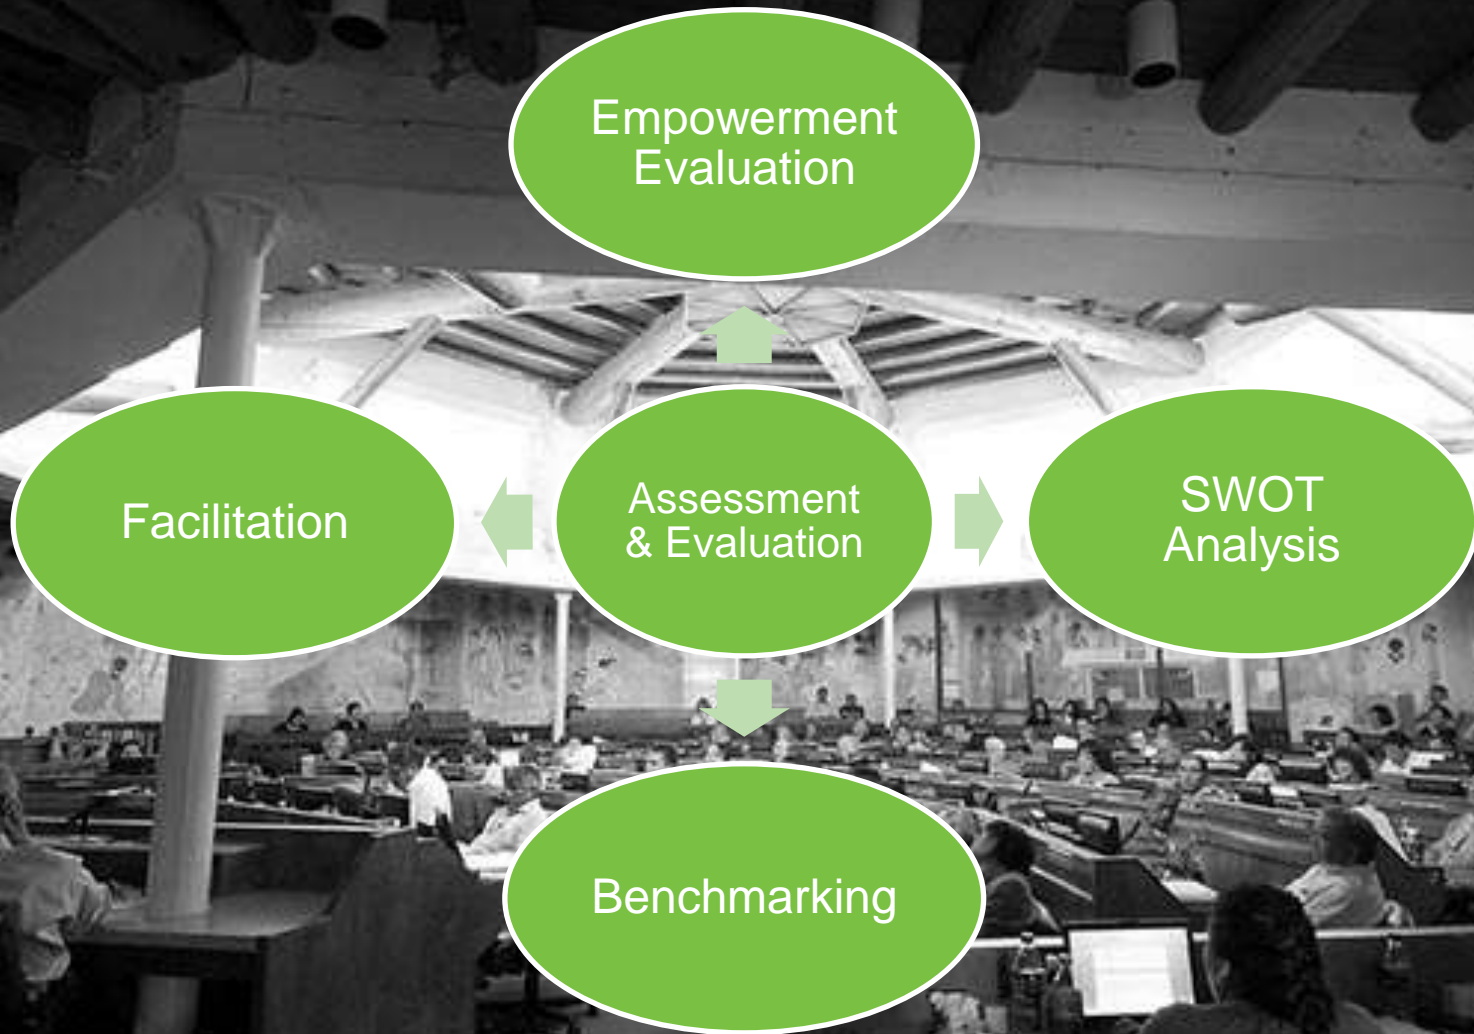

- Train the Trainer
- Visioning
- Strategic Planning
- Focus Groups
- Public Meetings

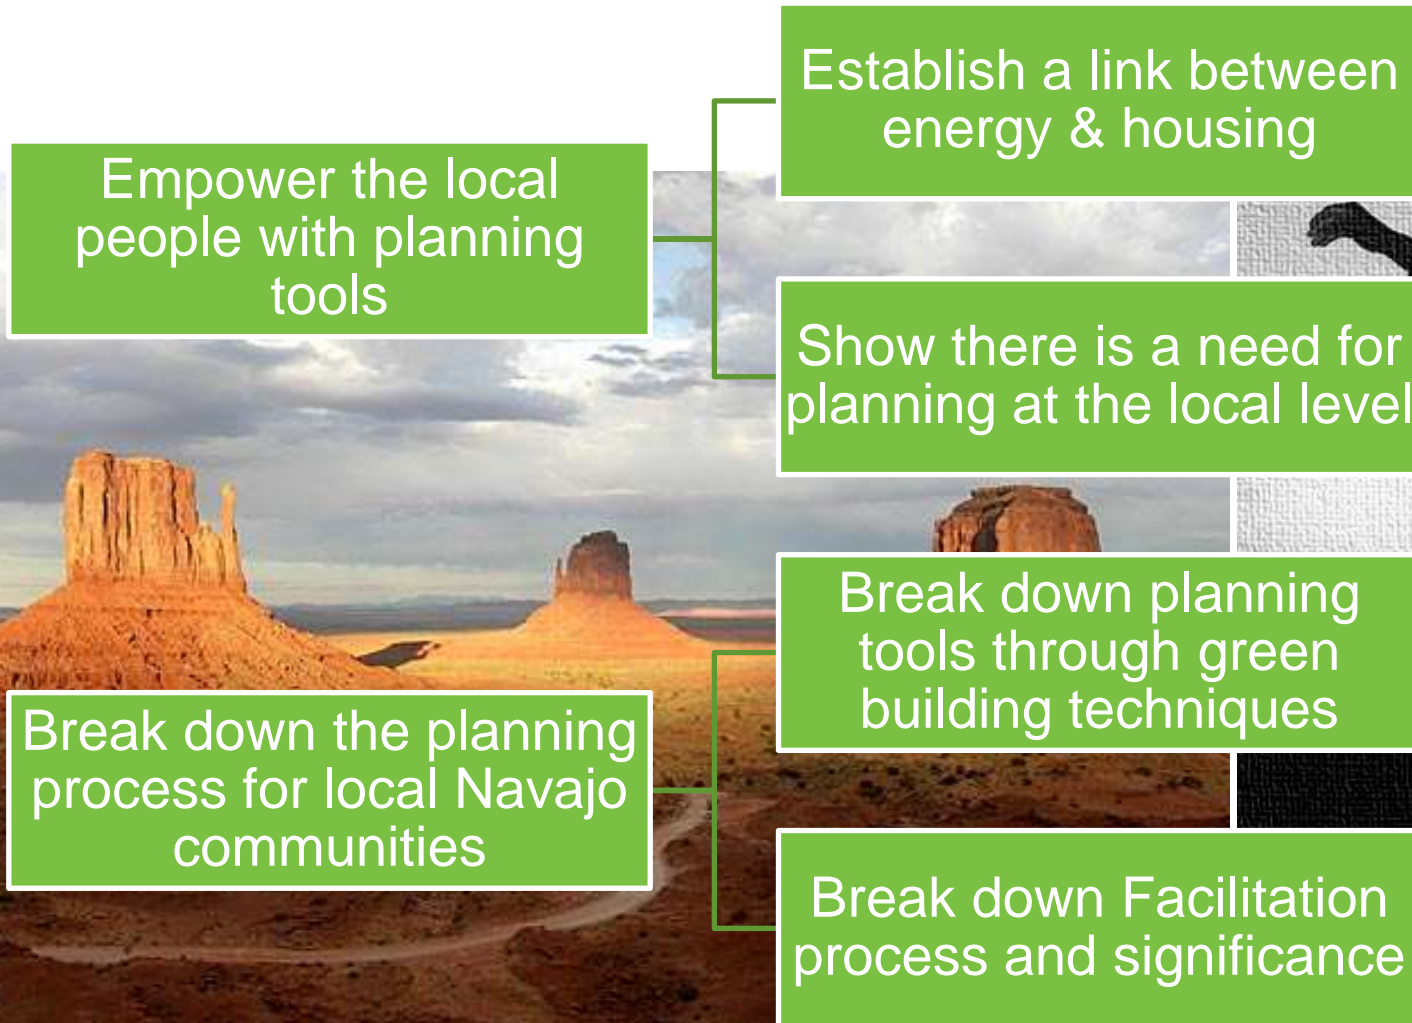

Examples of Tribal Green Building

- Mescalero
- Moores
- Navajo

Empower the local people with planning tools

Establish a link between energy & housing

Show there is a need for planning at the local level

Break down planning tools through green building techniques

Break down the planning process for local Navajo communities

Break down Facilitation process and significance
