Docket #	Description of FOIA Request	Status
GO-15-054	<p>1. All documents regarding detailed analysis and explanations why the attached grant proposal [submitted for a competitive grant by Tribology Testing Labs entitled “Wind Turbine Lubricant Standardization and Advancement Project” dated March 5, 2009] (which with proper consideration, NREL cooperation and follow-up would have successfully resolved gear box durability issues by 2013) was so carelessly rejected/discarded by DOE / NREL and Alliance for Sustainable Energy, LLC cohorts without benefit of ANY due diligence, no site visit, not even a phone call or request for additional information? What elements of said proposal have been adopted and followed up on by DOE/ NREL and Alliance for Sustainable Energy, LLC?</p> <p>2. Is it true that NREL/Alliance for Sustainable Energy, LLC's former grant reviewer/issuer never responded to phone calls and emails during the grant evaluation process, started his own consulting firm that has benefited handsomely by DOE/NREL government contracts & grants? Request documents showing related to this consulting company including monies awarded by DOE/NREL/Alliance for Sustainable Energy, LLC since his leaving NREL?</p> <p>3. How much US government grant money has been disbursed by US DOE/ NREL/Alliance for Sustainable Energy, LLC on sustainable energy projects since 2005?</p> <p>4. How much taxpayer dollars has DOE/NREL/Alliance for Sustainable Energy, LLC wasted on “junk science” and irrelevant research over the years spinning because NREL wind turbines and alternative energy installations are simply for show (ONLY), spinning in the wind, NOT CONNECTED TO our nations power grid, not generating revenues or defraying billions in taxpayer dollars funneled through Alliance for Sustainable Energy, LLC?</p> <p>5. When is scientifically valid research scheduled to begin with DOE/NREL / Alliance for Sustainable Energy, LLC with wind turbines and alternative energy installations in Boulder, CO actually connected to and contributing to our nations power grid so that wind turbines can be evaluated under realistic loads and real world conditions?”</p>	Completed – closed without action – unable to perfect FOIA request
