

# TRIBAL RENEWABLE ENERGY WORKSHOP SEPTEMBER 8, 2016

---

**Tribal/Private Partnership  
Opportunities**

# UTILITY-SCALE SOLAR ON TRIBAL LANDS - SUCCESS FACTORS

- Tribal lands meet siting criteria
  - Lots of sun
  - Open, flat land
  - Available transmission nearby and access to key customers
  - Avoid/Minimize impact to areas of critical environmental concern and cultural significance
- Tribal support for solar development
- Economically viable
- Solar partner with proven experience
- Will take vision, commitment and collaboration

# SOLAR PROJECTS OFFER KEY TRIBAL BENEFITS

- Solar is a clean, emission-free source of energy
- Will bring new source of economic growth to Tribes and create new jobs for tribal members
- Demonstrates value of the land
- Generates substantial lease revenues for Tribes over project lifetime without impacting future land use potential
- Can utilize tribal services during construction
- Supports tribal community and educational programs
- Use of Tribal lands for future generations can be preserved
