

**NEPA Determination for the  
Energy Efficiency and Conservation Block Grant Program  
Application submitted by the Native Village of Council of AK  
Energy Efficiency Retrofits**

The American Recovery and Reinvestment Act of 2009, Public Law 111-5, appropriates funding for the Department of Energy (DOE) to issue/award formula-based grants to states, U.S. territories, units of local government, and Indian tribes under the Energy Efficiency and Conservation Block Grant (EECBG) Program. DOE's authorization for this program is set forth in Title V, Subtitle E, of the Energy Independence and Security Act (EISA) of 2007. This CX determination is applicable to DOE elements reviewing and awarding formula-based and competitive grants under the EECBG Program, and includes, but is not limited to, EECBG Program activities under the purview of DOE-HQ Energy Efficiency and Renewable Energy, DOE Golden Field Office, and the DOE Oak Ridge Office. Energy efficiency retrofits would be conducted by various states, U.S. territories, units of local government, and Indian tribes.

The Native Village of Council would perform energy efficiency retrofits at tribal member residences and the tribe's community building. Proposed retrofits would include:

- Replacement of approximately 277 conventional 60-watt light bulbs in tribal homes with 13-watt Light Emitting Diode (LED) bulbs;
- Replacement of approximately 18 40-watt conventional fluorescent bulbs with 15-watt LED bulbs at the tribe's community building;
- Replacement of approximately six 60-watt conventional light fixtures with 15-watt LED fixtures and bulbs at the tribe's community building; and
- Replacing the existing water heater at the community center with an on-demand system.

The application submitted and the technical review for this proposal do not reveal any extraordinary circumstances related to the proposal that may affect the significance of the environmental effects of the proposal. The proposal is not "connected" to other actions with potentially significant impacts, or to other proposed actions with cumulatively significant impacts, and is not precluded by 40 CFR 1506.1 or 10 CFR 1021.211. The proposed development and implementation of energy efficiency and conservation activities funded by this grant would not result in an adverse effect to historic properties included or eligible for inclusion in the National Register of Historic Places (National Register), would not impact sensitive resources [e.g., threatened and endangered (T/E) species, wetlands and floodplains].

A1, B2.5 and B5.1 are the applicable CXs that cover the proposed action in the DOE NEPA Implementing Procedures, 10 CFR 1021, Subpart D, Appendix A and Appendix B.

Based on my review of the above description, I have determined that the above action is categorically excluded from further NEPA review and documentation. The DOE Contracting Officer Representative is responsible for oversight of the application of this determination.
