RESCHEDULED: Lessons From Iowa: The Economic, Market and Organizational Issues Facing Bulk Energy Storage

Join us for a Webinar on February 9

You are invited to attend a rescheduled free DOE webinar on Lessons from Iowa on February 9, 2012 from 1:00 PM to 2:30 PM EST (10:00 to 11:30 AM PST). The DOE Lessons webinar on January 20 experienced technical difficulties due to the large number of participants. This is a reschedule of that event, and all participants will need to reregister.

The experience of the Iowa Stored Energy Park (ISEP) compressed air energy storage (CAES) project yielded an extensive and innovative information base for use by other entities exploring utility-scale bulk energy storage. Funded by a grant from the U.S. Department of Energy's Storage Systems Program and managed by Sandia National Laboratories, the 270 Megawatt ISEP project was discontinued due to inadequate geology but yielded valuable insights in the development of large storage facilities.

In this webinar the ISEP team will present an overview of the Lessons from Iowa. Although based on CAES project experience, most of the Lessons are independent of geology or the storage technology being used.

Presenters will include:

• Dr. Imre Gyuk, U.S. Department of Energy Storage Systems Program Manager, who will provide a brief introduction of CAES projects funded by DOE.

• Bob Schulte of Schulte Associates LLC, ISEP Executive Director and Project Manager, will present an overview of the Lessons from Iowa results and formal report.

The full Lessons from Iowa report together with all underlying detailed reports and documentation are available for download via the www.isepa.com website. The Lessons report is posted on the DOE-Storage Systems Program website at: www.sandia.gov/ess.

Title: *RESCHEDULED: Lessons From Iowa: The Economic, Market and Organizational Issues Facing Bulk Energy Storage*

Date: Thursday, February 9, 2012

Time: 1:00 PM - 2:30 PM EST

After registering you will receive a confirmation email containing information about joining the Vebinar.

System Requirements
PC-based attendees
Required: Windows® 7, Vista, XP or 2003 Server

Macintosh®-based attendees
Required: Mac OS® X 10.5 or newer

Space is limited.
