Audience
DOE sites managing a Certificate Authority or a Registration Authority

Who should attend
TWG members, CA admins, RA admins, PKI project managers

Where to register
http://www.imcconference2012.com/Registration

The DOE PKI Technical Working Group (TWG) will have an all-day meeting and workshop at the IMC to finalize the migration planning for moving our DOE PKI to a Shared Service Provider.

The DOE Information Management Conference is being held this year from April 16-20 at the Omni Dallas in Texas. As part of that conference the PKI TWG Chair and the PKI Program Manager will host an all-day workshop on Thursday, April 19, to finalize plans for beginning the migration of the DOE legacy PKI to a Shared Service Provider. The Shared Service Provider vendor, Entrust, will be at the workshop to participate with us.

- Meet your colleagues face-to-face!

- Plan a new PKI that will cost-effectively manage digital identities, enable the mission of DOE, and meet the business needs of DOE Federal employees, contractor personnel, and business partners.

- Get closure on site migration plans

Topics covered:

- An update from the PKI Program Manager
- Entrust presentation on what is included in the SSP service
- Auditor presentation on the audit requirements for CAs and RAs that are members of the Federal PKI community
- Deep planning dive into:
  - User administration
  - Client management
  - Directory services
  - Handling G2B customers
  - Handling non-human entity certs
  - Registration Authority management
  - Registration Authority and Certificate Authority management
  - DOE root CA management
  - Support management (including Help Desk)
- Finalization of the migration test plan
