

Stora Enso North America

Corporate Headquarters: Wisconsin Rapids, WI

Global Headquarters: Helsinki, Finland

Proposed Facility Location: Wisconsin Rapids, WI

Description:

The project will construct and operate a thermal gasification and gas-to-liquids plant at Wisconsin Rapids Mill and produce liquid biofuels that will ultimately be converted into renewable diesel.

CEO or Equivalent: Mark A. Suwyn, Chairman and CEO

Participants: TRI; Syntroleum; DOE's Oak Ridge National Laboratory; and the Alabama Center for Paper and Bioresource Engineering at Auburn University

Production:

- 370 barrels per day (approximately under 5,500,000 gallons per year) of Fischer-Tropsch liquids

Technology and Feedstocks:

- 497 bone dry tons per day of woody biomass comprised of mill residues and unmerchantable forest biomass
- Technologies demonstrated through this project are scaled to fit within existing industrial infrastructure

State of Readiness:

- Support of corporate leadership to successfully deploy technologies at Wisconsin Rapids Mill.
- Full support of participants in this project.
- Estimated project completion: 2012.

NewPage Corporation/Stora Enso Media Point of Contact: Amber Garwood, Vice President Corporate Communications, (937) 242-9093.

Note: NewPage Corporation recently acquired Stora Enso North America, who originally submitted an application to DOE for this funding opportunity announcement.
