# Elements of Stewardship

- **Restrictions** on use of, or access to, land and water (institutional controls)
- **Information** management (gathering, storage, retrieval, and dissemination)
- **Monitoring**, operation and maintenance of implemented remedies
- Periodic **reevaluation** of remedies
- **Research** and development

# Remedial Analysis

# Lessons Learned from Rocky Flats

- Stewardship = Chicago voting – early and often
  - Stewardship is fundamentally a cleanup decision
- Create redundancies – both legal and physical
- Keep site in federal ownership
- Maintain separate funding stream – LM
- Cannot be too many cooks in the kitchen – maintain regulator and oversight community involvement
