

Department of Energy  
Washington, DC 20585

November 4, 2010

Mr. Timothy Orr  
Director of Product Development  
Advanced Distributor Products

**RE: Case No. 2010-SE-0304**

Dear Mr. Orr,

On May 28, 2010, DOE issued a Notice of Noncompliance Determination for two air conditioning heat pumps (basic model N2H348A(G)KB\* + H,GE50560 + \*8MPV125 and basic model N2H360A(G)KB\* + H,GE50560 + MV16J22\*\*B\*) manufactured by Advanced Distributor Products (ADP). Pursuant to that Notice, ADP provided information indicating that it had not sold these products in the United States.

DOE, as the agency charged with developing and administering a balanced and coordinated national energy policy, has determined, in light of these circumstances, that closing this case without further action properly balances the policies recognized in the Energy Policy and Conservation Act and is the appropriate way to resolve this matter. Accordingly, DOE Case Number 2010-SE-0304 is now closed.

Please note that pursuant to 10 C.F.R. § 430.62, all covered products must be certified with the Department of Energy as being in compliance with the applicable energy conservation standard. Please also note that pursuant to 10 C.F.R. § 430.24, if you have elected to use an alternative rating method (ARM) that has been approved by DOE, any modification to the ARM must also be approved by DOE.

If you have previously certified products, please note that you must notify DOE when production of a basic model has ceased and it is no longer being distributed. You must retain records for two years after production of a basic model has ceased. DOE has proposed to revise the current certification regulations to require annual submission of certification reports.

If you have any questions, you may contact Laura Barhydt at (202) 287-5772.

Sincerely,

David N. Krentel, Esq.  
Office of the General Counsel
