Record Description:

I am seeking records detailed in a 1994 GAO report (B-256471) surrounding the disposal at sea of 294 drums of radioactive waste in the Pacific Ocean southwest of Ketchikan, Alaska.]

The passage I'm referring to is:

"NRC records show that American Mail Line, Inc., was licensed to receive, possess, and dispose of radioactive waste generated by the Boeing Company located in Seattle, Washington. The related AEC license (46-3623-1) required that disposal of this waste in the Pacific Ocean take place at least 150 miles from the continental shelf and at a depth of greater than 6,000 feet. Prior to disposal, the licensee had to provide written notice to AEC that included the date of disposal, location of disposal, number of containers to be disposed of, total activity of the byproduct materials, amount of materials involved, and the identity of the most hazardous isotope in each container. Materials disposed of included radium-226, cobalt-60, strontium-90, promethium-147, phosphorus-32, fission products, heat lamps, and beryllium waste.

Between 1958 and 1969, American Mail Line dumped 294 55-gallon drums of radioactive waste in the Pacific Ocean about 350 miles southwest of Ketchikan. According to AEC records, AEC personnel observed the sea disposal operation and, in addition, made periodic inspections of the company's records and facilities. According to these records, no major instances of noncompliance were found."

I would like documentation, if these records now exist within the DOE, of:

- 1) the AEC license 46-3623-1;
- 2) the documentation that includes "the date of disposal, location of disposal, number of containers to be disposed of, total activity of the byproduct materials, amount of materials involved, and the identity of the most hazardous isotope in each container";
- 3) and the AEC records that describe how "AEC personnel observed the sea disposal operation and, in addition, made periodic inspections of the company's records and facilities."

In addition to these specific documents, I would like to request any other documentation, paper or electronic, that the DOE has that refers to this disposal or to other disposals or dumpings of radioactive (or chemical) wastes off the coasts of Alaska, Washington, and Oregon, (and B.C. if applicable) in international waters or otherwise.

I would like to receive the information in electronic format if replying in that format does not substantially increase the time and cost of fulfilling this request.

I agree to pay reasonable duplication fees for the processing of this request in an amount not to exceed \$25. However, please notify me prior to your incurring any expenses in excess of that amount.

If my request is denied in whole or part, I ask that you justify all deletions by reference to specific exemptions of the act. I will also expect you to release all segregable portions of otherwise exempt material. I, of course, reserve the right to appeal your decision to withhold any information or to deny a waiver of fees.

As I am making this request as a scholar and this information is of timely value, I would appreciate your communicating with me by telephone (347-591-8377) or email (rc2454@columbia.edu), rather than by mail, if you have questions regarding this request.

I look forward to your reply within 20 business days, as the statute requires.

Subject: Request for possible documents released under FOIA

Dear Mr. Haggerty,

The Embassy of Denmark would highly appreciate your assistance in a matter which is of great importance to the Danish government and the Danish Parliament.

The matter pertains to a crash of an aircraft carrying nuclear weapons over Greenland in 1968. A journalist from the BBC has written the

attached article about the incident which quotes and refers to allegedly declassified documents obtained by the BBC through the Freedom of Information Act. The article does not mention the title of the documents or which agency released them.

FOIA 2008-000251

The Danish Parliament has asked to receive the declassified documents to which the article refers. The Danish Minister of Foreign Affairs has been summoned to Parliament to explain the situation.

We initially contacted the Department of Defense who conducted a search and found the attached report. The quotes and information mentioned in the article do not seem to adhere from that particular report, which indicates that the information may come from other documents. The Department of State is currently carrying out a similar search.

Given the highly sensitive nature of the issue we would request the Department of Energy examine whether the document(s) to which the BBC article refers were released by the Department of Energy under the Freedom of Information Act. If this is the case we would appreciate if the Department of Energy would send the relevant documents as soon as possible the Danish Embassy. If the Department of Energy is in possession of the documents to which the article refers we would appreciate if you could send them to the Embassy.

If you need more information to initiate the search or have any questions, you are welcome to contact me. My contact information can be found below. We greatly appreciate your cooperation.

Sincerely,

Christian Stenberg

Record Description:

From 1992-Present

1. Inspection and compliance records and related correspondence for the Sequoyah Fuels facility in Gore, Oklahoma (address: I-40 Hwy 10, Gore, OK 74435), particularly the report on the digester accident.
2. The facility's most recent decommissioning plan.
3. The facility's groundwater monitoring plan and groundwater monitoring results from 2005-present.
4. Correspondence from 2008.

Preferred Form or Format: pdf

Type of Requester (if provided):

Affiliated with an educational or noncommercial scientific institution, and this request is made for scholarly or scientific purpose and not for commercial use.

Fees and Fee Waivers:

I request a waiver or reduction of fees.

Waiver or Reduction of Fees Factors (if provided):

1. The subject of the request: Whether the subject of the requested records concerns "the operations or activities of the government."

The subject of the requested records concerns the operations and activities of the Dept. of Energy, an agency of the government.

2. The informative value of the information to be disclosed: Whether the disclosure is "likely to contribute" to an understanding of government operations or activities.

The information is valuable because it will demonstrate the Dept.'s oversight of nuclear materials processing facilities.

3. The contribution to an understanding by the general public of the subject likely to result from disclosure, taking into account your ability and intent to disseminate the information to the public in a form that can further understanding of the subject matter.

The Coalition for the Environment is Missouri's statewide environmental citizen action organization with a near 40-year history of informing and educating citizens on

FOIA-2008-000753

DEC 02 2008 02

"OTHER" - 2 HOURS SEARCH FREE, 100 FREE PAGES

environmental issues. The Coalition maintains an extensive website, e-newsletter, and newsletter that informs the public.

4. The significance of the contribution to public understanding: Whether the disclosure is likely to contribute "significantly" to public understanding of government operations or activities.

Because there are few uranium fuel processing facilities in the nation, but proposals for more, understanding their regulation and operations is critical for local government decision makers.

5. The existence and magnitude of a commercial interest: Whether the requester has a commercial interest that would be furthered by the requested disclosure, and, if so

No commercial interest.

6. The primary interest in disclosure: Whether the magnitude of the identified commercial interest of the requester is sufficiently large, in comparison with the public interest in disclosure, that disclosure is "primarily in the commercial interest of the requester."

It is in the public interest to understand the Dept. of Energy's oversight and role in the operations of nuclear fuel facilities.

Freedom of Information Act Enquiries
U.S. Department of Energy
1000 Independence Avenue SW
Washington DC 20585
United States of America
2nd December 2008

Dear Madam / Sir,
Freedom of Information Act Request
Y-12 Uranium Production Facility: Exchange of Information with United Kingdom

This is a non-commercial request under the US Freedom of Information Act (5 U.S.C. Section 552). I am writing to request information held by the Department of Energy's National Nuclear Security Administration about liaison between the Oak Ridge Y-12 National Security Complex and the Atomic Weapons Establishment (AWE) in the United Kingdom over the development of a uranium production facility at Y-12 and an enriched uranium facility at AWE.

I should be grateful if you would provide me with copies of any of the following documentation which is held by the National Nuclear Security Administration:

- * [Reports and briefings to management produced following visits by AWE staff to the Y-12 facility in connection with the proposed development of a new enriched uranium facility at AWE Aldermaston.]
- * Reports and briefings to management produced following visits by NNSA staff / Y-12 contract staff to the United Kingdom in connection with the development of a uranium production facility at Y-12.
- * Any correspondence, including emails and reports, relating to joint working; the work of the joint Y-12 - AWE review team; and the exchange of information in relation to these two projects.
- * All outputs from the work of the joint Y-12 - AWE review team working on these projects, including documents on shared common design elements and approaches to design and regulatory standards.

To assist you in locating this information, I believe it would have been generated over the period January 2005 - present, and would be held by the lead manager and team working on Y-12's uranium production facility.

I do not consider that any of these documents will be exempt from release under Freedom of Information legislation, but if you disagree with my view I should be grateful if you would advise me in detail of your grounds for claiming exemption. I would anticipate challenging any ruling that these documents are exempt from release, so please

Shank

FOIA-2008-000758

DEC 03 2008
"OTHER" 2 HOURS SEARCH FREE, 100 FREE PAGES

advise me of the relevant appeal procedures and the contact details of the individual to whom an appeal should be addressed if you wish to claim exemption.

I should remind you that while the Freedom of Information Act allows an agency to withhold specified categories of exempted information, it requires the agency to release any segregable portions that are left after exempt material is deleted. If you decide to release documents in part with certain sections withheld, please indicate clearly where material has been withheld and on what grounds. I should be grateful if you would do this by blacking out, rather than whiting out, the relevant sections.

I am happy to receive the information in electronic form if it is available in this format. If you wish to provide the requested documents in electronic format please send them to me by email or on a CD-ROM in Adobe pdf file format.

In order to help to determine my status in assessing fees, I am advising you that I am a member of the United Kingdom Parliament (an elected public representative roughly equivalent to a member of the US House of Representatives) seeking information for the purposes of research into and education on public policy, and not for a commercial use. Further details of my work and publications can be found on my own website at <http://www.normanbaker.org.uk> and on the independent website www.theyworkforyou.com.

I request a waiver of all fees for this request. Disclosure of the requested information is in the public interest because it is likely to contribute significantly to public understanding of the operations or activities of the government and is not in my commercial interest. Both US and UK citizens have the right to know about the level of co-operation between their governments on nuclear weapons issues, and how these activities might affect them or pose risks for them. It is therefore in the public interest for the Department of Energy to release the information that I am requesting.

I understand that verdicts in legal cases relating to the Freedom of Information Act call for a liberal interpretation of the fee waiver standard when the information requested shows the manner in which the operations of a government agency affect the public. Please consider my request for a fee waiver in this context.

Information from the material I have requested which contributes to public understanding will be summarised and disseminated to the public in the format of research reports and news releases which will be included on my website and distributed to the media. It will also be used to inform debate and aid civil society organisations in contributing to regulatory approval processes for planned development at AWE in the UK.

Please do not hesitate to write to me if you have any questions about my request or if you need any additional information from me.

Thank you for your assistance in considering this request, and I look forward to hearing from you within ten working days, as required under the Freedom of Information Act.

Yours faithfully,

Norman Baker

Member of Parliament for Lewes

Norman Baker
MP for Lewes

House of Commons

Mr. Kevin Hagerty
U.S. Department of Energy
FOIA/Privacy Act Group
1000 Independence Avenue, SW
Washington, D.C. 20585

Dear Mr. Hagerty:

This is a request under the Freedom of Information Act.

I request a copy of the following document:

* [Note for Record, dated December 17, 1999, on National Defense University College of the Armed Forces letterhead - Subject: Background Leading to John Hnatio's Resignation as Department of Energy Director for Proliferation Prevention Program (IPP) in June, 1997, with attachment]

Please note that the above document is contained in the files of the Department of Energy, Office of Declassification as it was officially determined to be unclassified and approved for public release on December 30, 1999.

To help you determine my status for the purpose of assessing fees, I am a representative

Record Description:

1. All materials related to a meeting that occurred on or about March 28, 2008, at the Department of Energy (DOE) between Under Secretary Clarence H. Albright, Jr., and Acting Assistant Secretary for Fossil Fuel James A. Slutz of DOE and Bernie Robinson and Ron McMurray of the Livingston Group, L.L.C. Others may have been in attendance. The meeting concerned the Gilberton Project which is intended to result in the construction of a waste coal-to-liquids (CTL) plant in Gilberton, Pennsylvania. (See, e.g., DOE solicitation DE-PS26-02NT41428.) We request all materials related to the meeting, including any correspondence, telephone logs, calendar entries, agendas, minutes, notes, presentations, and any other documents generated in connection with the meeting.

2. Copies of all records and logs used to record visitors to the U.S. Department of Energy Headquarters, 1000 Independence Avenue, SW, Washington, DC 20585, for the period beginning July 1, 2006 through December 3, 2008.

Re: Freedom of Information Act Request

DEC 10 2008 0/
OTHER: 2 HOURS SEARCH FREE, 100 FREE PAGES
December 1, 2008

Dear FOIA Officer;

This is a request under the Freedom of Information Act 5 U.S.C. § 552.
I request that a copy of the following documents be provided to me:

I am interested in the establishment of guidelines for the classification of the applications of lasers towards nuclear weapons (specifically in the form of laser fusion) that were developed by the Atomic Energy Commission in December 1963.]

In a letter from 1971, AEC General Manager R.E. Hollingsworth described the activity in question as follows:

...The Commission had become seriously concerned about the applications of lasers several years ago when lasers were still in the early stages of their development. The reason for their concern was the recognized fact that lasers had a definite potential in the nuclear weapon field. ...

To help us in the solution of the [classification] problem, we asked Dr. Lyman Spitzer, of Princeton University, Dr. Peter Franken, of the University of Michigan, Dr. Ray Kidder, of the Lawrence Livermore Laboratory, Dr. Francis Bryne, of the Department of Defense, and C.L. Marshall, of our Division of Classification, to study this serious question and to provide us with reasonable classification criteria. Their meeting took place in December 1963 and the criteria which they developed were jointly adopted by the AEC and the Department of Defense early in 1964.¹

I have included the above to help you determine where these records may be kept. I am interested in all correspondence, memos, transcripts of meetings, reports, etc. I am interested in all records of this meeting and of the aforementioned criteria.

In order to help to determine my status to assess fees, you should know I am a graduate student research affiliated with the Department of the History of Science at Harvard University, an educational institution, and this request is made for a scholarly or scientific

¹ Letter from R.E. Hollingsworth to Melvin Price, Hearings before the Subcommittee on Research, Development, and Radiation of the Joint Committee on Atomic Energy, 92nd Congress, 1st Session, 10-11 November 1971, Part 2, on 619.

FOIA-2008-005766

purpose and not for commercial use. The history of laser fusion technology is of great scholarly interest, and the history of its declassification will shine a light on AEC activities during this time period, especially in revealing how AEC officials at the time balanced the concerns of national security (potential proliferation of weapons design information) against the concerns of civilian benefits (potential energy source).

I am willing to pay fees for this request up to a maximum of \$50. If you estimate that the fees will exceed this limit, please inform me first.

I request a waiver of all fees for this request if possible. Disclosure of the requested information to me is in the public interest because it is likely to contribute significantly to public understanding of the operations or activities of the government and is not primarily in my commercial interest.

If you deny any part of this request, please cite each specific reason that you think justifies your refusal to release the information and notify me of appeal procedures available to me under the law.

If you have any questions processing this request, you may contact me at the following telephone number or e-mail address : 617-501-0360, wellerst@fas.harvard.edu. Thank you for your consideration of my request.

Sincerely,

Alex Wellerstein

Re: Freedom of Information Act Request

December 1, 2008

Dear FOIA Officer,

This is a request under the Freedom of Information Act 5 U.S.C. § 552.
I request that a copy of the following documents be provided to me:

I am looking for whatever records are available of the **Ad Hoc Classification Panel on Laser Applications**, later called the **Laser-Fusion Classification Panel**, formed in late November 1970.¹ Members of the Panel included: Frederick Seitz, Chairman; Robert F. Bacher; J. Carson Mark; Marshall N. Rosenbluth; Jack W. Rosengren; Robert L. Sproull; Gerald F. Tape; and Charles F. Townes.²

The Panel held a number of meetings in early 1971, the first being February 4-5, 1971, at the AEC H Street Office in Washington, D.C., and the second being on May 21, held either at the H Street Office or in Germantown.³ The first meeting definitely had a transcript made of it, the second likely did as well. This work eventually led to the creation of the first draft Laser Fusion Classification Guide (CG-LF-1) in 1974, and the second draft guide (CG-LF-2).⁴ An additional meeting took place at Lawrence Livermore National Laboratory on May 15-16, 1974, to discuss proposed changes to the guides, which were implemented in the first Laser Fusion Classification Guide in August 1974.⁵

I have included the above to help you determine where these records may be kept. I am interested in all correspondence, memos, transcripts of meetings, reports, etc.

¹ Glenn T. Seaborg, Office Diary (23 November 1970), page 119212, copy in Nuclear Test Archive, Las Vegas, California, Document NV0913292: "We finally agreed to go head with the appointment of a special Classification Panel to consider the difficult problem of laser applications to controlled thermonuclear reactions and the possibility of carrying on such work to a limited extent in unclassified situations."

² Letter from R.E. Hollingsworth to Melvin Price, Hearings before the Subcommittee on Research, Development, and Radiation of the Joint Committee on Atomic Energy, 92nd Congress, 1st Session, 10-11 November 1971, Part 2, on 619.

³ Charles L. Marshall to Robert F. Bacher (20 January 1971), and Charles L. Marshall to Robert F. Bacher (29 March 1971), both in Robert F. Bacher Papers, Caltech Institute Archives, Pasadena, California, box 25, folder 1.

⁴ Charles L. Marshall to Robert F. Bacher (23 January 1974), in Robert F. Bacher Papers, Caltech Institute Archives, Pasadena, California, box 25, folder 1.

⁵ Charles L. Marshall to Robert F. Bacher (29 August 1974), in Robert F. Bacher Papers, Caltech Institute Archives, Pasadena, California, box 25, folder 1.

In order to help to determine my status to assess fees, you should know I am a graduate student research affiliated with the Department of the History of Science at Harvard University, an educational institution, and this request is made for a scholarly or scientific purpose and not for commercial use. The history of Inertial Confinement Fusion technology is of great scholarly interest, and the history of its declassification will shine a light on AEC activities during this time period, especially in revealing how AEC officials at the time balanced the concerns of national security (potential proliferation of weapons design information) against the concerns of civilian benefits (potential energy source).

I am willing to pay fees for this request up to a maximum of \$50. If you estimate that the fees will exceed this limit, please inform me first.

Re: Freedom of Information Act Request

December 1, 2008

Dear FOIA Officer,

This is a request under the Freedom of Information Act 5 U.S.C. § 552.
I request that a copy of the following documents be provided to me:

I am looking for whatever records are available of the AEC Division of Classification's decision to declassify basic concepts in Inertial Confinement Fusion (laser fusion) in 1970-1971, specifically the declassification decisions that led to the disclosures by John Nuckolls and Lowell Wood at the International Quantum Electronics Conference in Montreal in May 1972, and were published in September 1972 in the journal *Nature*.¹

Nuckolls specifically said the following about this declassification action:

In 1970, I proposed the AEC declassify our new calculations of a DT bare drop directly imposed by laser light. The AEC approved. ... The Atomic Energy Act provides for declassification of some weapons information useful for peaceful applications of atomic energy. I believed that declassification of the directly driven, bare drop scheme was feasible. In a presentation to the AEC Classification Committee chaired by Charles Marshall, I stressed the following: a hohlraum is not used; a simple, bare spherical droplet does not reveal classified weapons design information; and classification manufacturing techniques are not revealed. The AEC approved most of this proposed ICF declassification.²

I have included the above to help you determine where these records may be kept. I am interested in all correspondence, memos, reports, etc. relating to the determination of the declassification decision.

In order to help to determine my status to assess fees, you should know I am a graduate student research affiliated with the Department of the History of Science at Harvard University, an educational institution, and this request is made for a scholarly or scientific purpose and not for commercial use. The history of Inertial Confinement Fusion

¹ John Nuckolls, Lowell Wood, Albert Thiessen, and George Zimmerman, "Laser Compression of Matter to Super-High Densities: Thermonuclear (CTR) Applications," *Nature* 239 (15 September 1972): 139-142.

² John H. Nuckolls, "Contributions to the Genesis and Progress of ICF," in Guillermo Velarde and Natividad Carpintero Santamaría, eds., *Inertial Confinement Nuclear Fusion: A Historical Approach By Its Pioneers* (London: Foxwell & Davies, Ltd., 2007): 1-48, quotes from 15 and 20.

technology is of great scholarly interest, and the history of its declassification will shine a light on AEC activities during this time period, especially in revealing how AEC officials at the time balanced the concerns of national security (potential proliferation of weapons design information) against the concerns of civilian benefits (potential energy source).

I am willing to pay fees for this request up to a maximum of \$50. If you estimate that the fees will exceed this limit, please inform me first.

I request a waiver of all fees for this request if possible. Record Description:

The Energy Policy Act of 1992 (EPAct) requires certain state vehicle fleets to acquire alternative fuel vehicles and report their compliance to the US DOE. This program is administered by the US DOE, Energy Efficiency and Renewable Energy, Vehicle Technologies Program. I am requesting the following data from this program: the [Current number of alternative fuel vehicles in the fleets of all state departments of transportation, and the current total number of any type of vehicles] (alternative and conventional fuels combined) [in the fleets of all state departments of transportation]. This data should be disaggregated to the point where I can see how many vehicles correspond to each individual state department of transportation. If a state does not have a department of transportation please provide information from the equivalent entity as shown on this webpage <http://www.fhwa.dot.gov/webstate.htm>. If it is easier to provide the data for all 313 entities covered under the program, please do so and I will query the data for the entities I need. If you do not have the total number of alternative fuel vehicles currently in each fleet please provide the number of alternative fuel vehicles acquired by each entity for every year available. Please feel free to contact me at the phone number or email address provided with any questions about this data request. Thanks so much, David Kall

Preferred Form or Format: Excel file or other electronic format

Type of Requester (if provided):

Affiliated with a private corporation and seeking information for the use in the company's business.

Fees and Fee Waivers:

I request a waiver or reduction of fees.

Waiver or Reduction of Fees Factors (if provided):

1. The subject of the request: Whether the subject of the requested records concerns "the operations or activities of the government."

This request concerns the operation of state departments of transportation. Specifically, we are seeking alternative fuel fleet information for state departments of transportation to help determine what contributions they are making toward greenhouse gas reductions.

2. The informative value of the information to be disclosed: Whether the disclosure is

FOIA-2008-000974

Branch

DEC 17 2008 02
COMMERCIAL SEARCH, REVIEW & REPRODUCTION

"likely to contribute" to an understanding of government operations or activities.

Yes, this information is likely to contribute to an understanding of government operations through its compilation into a National Cooperative Highway Research Program (NCHRP) report, which is a partnership between the US Department of Transportation and state transportation agencies. The goal of this report is to assess the impact of state department of transportation programs that reduce greenhouse gas emissions.

3. The contribution to an understanding by the general public of the subject likely to result from disclosure, taking into account your ability and intent to disseminate the information to the public in a form that can further understanding of the subject matter.

NCHRP reports are available to the public online at <http://www.trb.org/CRP/NCHRP/NCHRP.asp> and can be found in hard copy in public libraries.

4. The significance of the contribution to public understanding: Whether the disclosure is likely to contribute "significantly" to public understanding of government operations or activities.

This NCHRP report will provide clear and concrete numbers on the contributions state departments of transportation are making toward greenhouse gas reductions.

5. The existence and magnitude of a commercial interest: Whether the requester has a commercial interest that would be furthered by the requested disclosure, and, if so

The only commercial interest we have is to fulfill our contract with the National Cooperative Highway Research Program to complete this report.

6. The primary interest in disclosure: Whether the magnitude of the identified commercial interest of the requester is sufficiently large, in comparison with the public interest in disclosure, that disclosure is "primarily in the commercial interest of the requester."

The primary interest in disclosure is to be able to describe the actions of state departments of transportation to reduce greenhouse gas emissions for the NCHRP program and subsequently for the public.

Record Description:

Hello:

This press relaease from October announced several grants to the University of Nevada Reno:

<http://www.emcbc.doe.gov/files/news/U%20NEV%20RENO%20NR%20100108.pdf>

I want to review the ("mission statement" and any other supporting documents) within the limits of my fee, if any) for this particular grant:

("For materials science and materials research, a \$2,681,400 grant) will assist research in the electrochemical reprocessing of spent fuels, the use of titanate nanotubes to immobilize radionuclides, and to produce hydrogen at the University's Center for Materials Reliability")

Note: I have been in touch with the contact person listed on the press release on numerous occassions, to no avail. Also, a search of DOE records has been unproductive. If you can steer me to the proper site, I would welcome that as an alternative to hard copy.

Thanks, Steve

Preferred Form or Format: pdf

Type of Requester (if provided):

An individual seeking information for personal use and not for commercial use.

Fees and Fee Waivers:

I request a waiver or reduction of fees.

Waiver or Reduction of Fees Factors (if provided):

4. The significance of the contribution to public understanding: Whether the disclosure is likely to contribute "significantly" to public understanding of government operations or activities.

This particular Grant seems somewhat mysterious to me in the sense that 1)spent fuel reprocessing is a rather mature technology and I'm puzzled that there is significantly

Dear Sir/Madam:

I refer to my your letter to me, dated November 14, 2008, in which you provided a list of Department of Energy senior executive service members from January 1, 2002 until present.

The reference is: FOIA-2088-000559

I hereby request the following documents for the employees listed in your response to me:

- a. Financial disclosure forms submitted from January 1, 2002 until present; and
- b. Any applications (including supporting documents, such as emails, letters, faxes, memoranda) for the employee to undertake outside work.

I am a member of the news media and request the usual treatment with respect to costs.

Please do not hesitate to contact me should you require any clarification of this request. My contact information, including postal address, is below.

Best,

Sharona Coutts

Re: Freedom of Information Act Request

Request sent by FAX to (505) 845-5063 and by Email to foiofficer@doeal.gov

Dear Ms. Becknell:

We understand that the Department of Energy (DOE) Environmental Management Office of Groundwater and Soil Remediation (Mr. Vincent Adams, Director) during 2008 conducted meetings to gain information on groundwater issues at various DOE facilities including, but not limited to: Los Alamos National Laboratory (LANL); Hanford, WA; Idaho National Laboratories (INL), and; Sandia National Laboratories (SNL). Under the Freedom of Information Act, 5 U.S.C. subsection 522, Citizen Action New Mexico is requesting access to full and complete copies of the following records:

1. Copies of all data and records furnished to the Groundwater and Soil Remediation group regarding each site from which data and records were collected.
2. Any reports, summaries or other compilation of data written by the Groundwater and Soil Remediation group regarding the various sites visited or from which information was received.
3. Any questionnaires that were used by the Groundwater and Soil Remediation group to obtain information.
4. Copies of all data and records furnished to Dr. Justin Marble or any other members of the Groundwater and Soil Remediation group regarding the Mixed Waste Landfill or any other facilities at SNL.
5. Provide copies of all letters or other documents furnished to individuals or public organizations by the Groundwater and Soil Remediation group relevant to the above time period and fact finding mission. Include any written materials, slide presentations, etc., presented at any public meetings they attended.

Citizen Action New Mexico is a special interest citizen-based organization that publishes or disseminates information that will be beneficial to the public as well as for scientific and potential regulatory purposes; therefore, I am requesting a waiver of all fees associated with this request. Disclosure of the requested information is in the interest of the public as it is likely to contribute significantly to public knowledge and education; public health issues; and other concerns frequently cited by members of the public (*please refer to Section 2). This request is not in our commercial interest nor are we a business attempting to collect information on industrial competitors.

9/15/2008

FOIA-2008-000782

Sheila

Section 1.

Please note the following information:

1. Citizen Action is a non-profit citizen group under the fiscal auspices of the New Mexico Community Foundation (NMCC), Santa Fe, New Mexico. Citizen Action represents at least 16-non-governmental organizations (NGOs) and neighborhood associations as a part of its coalition. The organizations within the coalition include: Southwest Research and Information Center (SRIC); Citizens for Alternatives to Radioactive Dumping (CARD); Peace Action New Mexico (PANM); Progressive Albuquerque Network (PAN); Southwest Organizing Project (SWOP); Native Forest Network (NFN); Center for Action and Contemplation (CAC); Green Party of New Mexico; Bernalillo County Green Party; International Depleted Uranium Study Team (IDUST); Living Rivers; Forest Guardians; Mountain View Neighborhood Association; South Meadows Neighborhood Association; New Mexico Solidarity Network (NMSN); and Stop The War Machine (STWM).
2. Intentionally left blank.
3. Citizen Action's interactive website (www.radfreenm.org) contains a partial listing (29 entries) of information from previous documents obtained by our organization under the Freedom of Information Act (FOIA). The contact information for the University of New Mexico Zimmerman Library, U.S. Department of Energy Reading Room, where the entire collection of FOIA documents is available for public review, is also posted on our website.
4. Citizen Action's website receives on average between 2,500 - 6,000 hits per month. In addition to posting independent technical reviews of the Mixed Waste Landfill, press releases, newspaper articles, action alerts, related lawsuits, and meeting announcements the results of FOIA requests are summarized and posted on the Citizen Action website.
5. Citizen Action is expanding its research on legacy waste sites at SNL/NM to other concerns regarding weapons activities and programs currently being conducted at SNL/NM. A short survey was recently mailed to over 750 interested individuals and organizations throughout the State of New Mexico to gauge public interest in programs at SNL/NM. The "Get To Know Sandia" survey has also been posted on the Citizen Action website where members of the public can register their comments electronically.
6. Citizen Action sends press releases to the local media announcing the results of FOIA reviews for further dissemination of this information to the public. Citizen Action also makes appearances on television and radio programs and disseminates information obtained from FOIA requests.
7. Citizen Action maintains an active and rapidly growing e-list serve and member mailing list of over 700 people to provide updated information on issues at SNL/NM. We network with other groups in disseminating information on SNL/NM issues such as neighborhood organizations, clubs, churches, schools, unions, businesses, and other non-governmental organizations
8. As we have done in the past, information obtained from previous FOIA requests are shared with the New Mexico Environment Department (NMED).

Section 2.

We are requesting the full disclosure of the information requested under this FOIA as this information will:

- 1) Fulfill the public's right-to-know about SNL/NM's future programs and activities to be conducted at

9/15/2008

the lab over the next 10-years;

2) Provide, in the spirit of openness and transparency, responses to questions from the public concerning SNL/NM's future programs and activities;

3) Enhance the general public's understanding of government operations at SNL/NM;

4) Provide information that may affect regulatory issues and oversight by the NMED concerning future programs and activities at SNL/NM, and the potential impact of these programs and activities on surrounding communities;

5) Provide information about programs and activities at SNL/NM that may potentially have an impact on our world at state, national, and international levels;

6) Contribute to information concerning the next Site-Wide Environmental Impact Statement (SWEIS) conducted for SNL/NM;

7) Provide members of the public with information that may potentially relate to important matters of public health and protection of the environment concerning SNL/NM's future plans for activities and programs conducted at the lab.

Citizen Action New Mexico is requesting a full fee waiver for all items requested under this FOIA request with the NNSA/United States Department of Energy (NNSA/USDOE) as the agency solely responsible for any costs associated with this request at no cost to the taxpayer or the requester. We hope this information is sufficient for you to assess our request for a fee waiver.

As the FOIA requires, Citizen Action will look forward to a response from NNSA within 20 days.

If all or part of our request is denied, please cite each specific exemption that justifies your refusal to release the requested information, and please notify me of appeal procedures available under the law. If you have any questions about the handling of this request or the information requested therein you may call me at (505) 262-1862. Thank you very much.

Sincerely yours,

David B. McCoy, Director

Record description:

Dear Sir or Madam:

My name is Jason Greenberg, a doctoral candidate at the Sloan School of Management, Massachusetts Institute of Technology. I am interested in data that can be used to assess social networks in government agencies and their implications for economic performance. To this end, I submit to you this FOIA request.

I hereby request (blinded) data concerning the educational, occupational, and Energy Department (henceforth "ED") backgrounds of ED employees for the period 1990 - 2005. Per common scientific standards, I am NOT requesting--nor do I require--any personal information (e.g., first and surnames) that can be used to discern the identity of any specific employee.

Rather, I hereby request blinded data for all ED employees during the above-defined time-frame that includes the following:

- 1) ED pay-grade
- 2) ED job title
- 3) ED geographic location
- 4) ED line of business
- 5) Month/year of ED hire
- 6) Prior employment (names of company(ies) or government agency(ies) worked at)
- 7) Month/years worked at prior employment
- 8) Graduate education institution (if applicable), and degree type
- 9) Graduate education date of degree receipt
- 10) Undergraduate education institution (if applicable), and degree type
- 11) Undergraduate education date of degree receipt

Please do not process this request until you can provide, and I can authorize, an estimate for the fees pertaining to such a request. Concomitantly, I request that in estimating fees you consider granting me a waiver of reduction of fees pursuant to 15 CFR sub-section 4.11 (K) as I am a graduate student seeking to do work that facilitates society's understanding of the social and economic foundations of our collective well-being.

If you have any questions or require any additional information, please contact me at jason_06@mit.edu or 917-538-6357.

Best regards,

Jason

Preferred Form or Format: Excel

Type of Requester (if provided):

Affiliated with an educational or noncommercial scientific institution, and this request is made for scholarly or scientific purpose and not for commercial use.

Fees and Fee Waivers:

I request a waiver or reduction of fees.

Waiver or Reduction of Fees Factors (if provided):

1. The subject of the request: Whether the subject of the requested records concerns "the operations or activities of the government."

To some extent

2. The informative value of the information to be disclosed: Whether the disclosure is "likely to contribute" to an understanding of government operations or activities.

Yes

3. The contribution to an understanding by the general public of the subject likely to result from disclosure, taking into account your ability and intent to disseminate the information to the public in a form that can further understanding of the subject matter.

Yes

4. The significance of the contribution to public understanding: Whether the disclosure is likely to contribute "significantly" to public understanding of government operations or activities.

That is the intent

5. The existence and magnitude of a commercial interest: Whether the requester has a commercial interest that would be furthered by the requested disclosure, and, if so

No

6. The primary interest in disclosure: Whether the magnitude of the identified commercial interest of the requester is sufficiently large, in comparison with the public interest in disclosure, that disclosure is "primarily in the commercial interest of the requester."

No commercial interest
