

Revision of DOE M 460.2-1, Radioactive Material Transportation Practices Manual

DOE Writing Team

Proposed Revision Timeline

Complete new draft of Manual	2/06
Draft Manual provided to Manual Review Topic Group for review & comment	3/14/06
Comments due from Topic Group	5/01/06
Comment resolution (thru conference calls with Topic Group, as needed)	6/06
Final draft Manual	7/06

Proposed Timeline (contd.)

Manual is submitted into the formal Directives process	9/06
Manual reissued	12/06

Major Changes Made to the Manual

- Clarification/update of information relative to OCRWM shipments, including:
 - Primary shipping mode will be dedicated trains
 - Tracking using comparable system
- Included the use of “enhanced” fact sheets for LLW shipments not requiring transportation plans
- Statement of TEPP training compliance with NIMS & NFPA standards.

Major changes (contd)

- Security – incorporated input from the Security Topic Group
 - Discussion on protection of information
 - Inclusion of DOT security requirements – 49 CFR 172.800, particularly for LLW
 - DOE equivalency with NRC additional security measures
- Revised attachment on Additional Resources
