DOE Technical Standards Program Activities Summary

Technical Standards Activities Summary as of July 16, 2009

Document Status	Description of Status	Number of Documents
In Conversion	Conversion of a DOE technical standard to a national consensus standard is a beneficial process that provides exposure for that document to other public and private sector interests. When a DOE standard is converted, a voluntary-consensus, non-DOE standards developing organization assumes responsibility for it. DOE has no further responsibility for the maintenance of the standard when this occurs.	0
In Preparation	Includes draft DOE technical standards being developed but not yet out for review and comment.	16
Out for Comment	Includes draft DOE technical standards that have been posted for review and comment in the TSP RevCom system.	19
Published in June	Includes DOE technical standards that have completed the TSP review/comment and approval process. These approved standards are posted on the TSP webpage for use.	1

Five-Year Review Status

Document Status	Description of Status	Proposed/In Progress
Revision	A revision occurs when a DOE technical standard requires technical changes or editorial changes in excess of 25% of its content.	4 / 3
Reaffirmation	A reaffirmation occurs when making no changes to a DOE technical standard at its 5-year review.	1 / 19
Cancellations	Cancellation occurs when a DOE technical standard no longer serves a purpose to DOE as determined by the Office of Primary Interest (OPI) and subsequent TSP RevCom review.	6 / 0
