

Doing Business with the Office of Environmental Management

The seal of the Department of Energy, United States of America, is a large, faint watermark in the background. It features an eagle with wings spread, perched atop a shield. The shield contains a lightning bolt, a sun, and a gear. The text "DEPARTMENT OF ENERGY" is written in a circle around the eagle, and "UNITED STATES OF AMERICA" is written in a larger circle at the bottom.

Christopher Honkomp
Office Director
Office of Procurement Planning

December 12, 2013

Improve Contract and Project Management

DOE EM Goal: Improve project and contract management with the objective of delivering results on time and within cost.

- Strategy 1: Annually-assess contract and project management staffing and skills to build and sustain needed capacity for Federal oversight of EM mission. (GAO High Risk Criteria.)
- Strategy 2: Independently-validate the effectiveness and sustainability of contract and project management improvement actions through project and contract management reviews. (GAO High Risk Criteria.)
- Strategy 3: Improve the timeliness of approvals for contract performance baselines, contract modifications, and project changes to maintain contract, project and budget alignment by ensuring change management requirements and guidance is understood and being followed.
- Strategy 4: Increase the use of prime contractor small businesses.
- Strategy 5: Become a stronger owner by ensuring requirements are clearly delineated in the contracts, by holding contractors accountable for delivering results, and by ensuring contractors' performance is fairly documented.

Emerging policy implementation

– Deputy Secretary's memorandum of December 2012

- Improve Upfront Planning and Requirements Definition
- In selecting contract type, contracting officers will first consider the use of a firm-fixed-price contract
- Contracting Officers and program officials shall consistently document real-time contractor performance
- The Department will structure contracts so that contractors will bear the responsibility for their actions, i.e., taxpayers should not pay the contractor for poor performance or negligence.

• Business Systems

Acquisition Letter (AL) 2013-11 implements compliance enforcement mechanisms in the form of business systems clauses and related clauses that requires the contractor to have acceptable business systems that comply with system criteria. The contractor will be required to have acceptable business systems for cost estimating, accounting, and earned value management.

Aligning Contract Incentives

- **Ensure contracts align with taxpayer interests and structure contracts so contractors bear responsibility**
 - Hold contractors accountable for overruns due to negligence
 - Share savings due to better-than-promised performance
- **Improve upfront planning and requirements definitions**
 - Ensure sufficient design and technical readiness before beginning construction activities
- **Consider Firm-Fixed-Price (FFP) contracts first**
 - Identify work that can be awarded FFP in new procurements and when exercising options on current contracts
 - Negotiate cost caps or ceilings on existing contracts
- **Use objective performance based incentives for non-FFP contracts**
- **Use provisional fee, hard cost caps, or cost share approaches**
 - Ensures parties bear responsibility for their actions
- **Document performance**
 - Hold contractors accountable
 - Hire contractors who provide good performance

Office of Environmental Management Locations

- Hanford (Washington)
- Savannah River Site (South Carolina)
- Portsmouth (Ohio)
- Paducah (Kentucky)
- Consolidated Business Center (Ohio)
- Idaho Cleanup Project (Idaho)
