# Closed Loop Stack NOx Control

Power Generating Stationary Engines Stack NOx Control:  
A Closed Loop Control Technology

**Poster: P-11**

**Dr. Hamid Servati, PhD**

**Steve Marshall, Wei Zhou**

## Applications:

- Power plants
- Gen sets
- Gas pumping stations
- Water pumping stations
- Refineries
- NOx generating engines
- Stationary

## Technology (DeNOxer):

- Closed loop control strategy
- 95% NOx reduction
- No need initial engine data
- Control panel with SEEC2
- Dosing unit
- SCR reactor
