

2013-2014 Volkswagen Jetta HEV Accelerated Testing - September 2014

Four model year 2013-2014 Volkswagen Jetta hybrid electric vehicles (HEVs) entered Accelerated Testing - one during March 2013 and the other three during December 2013 in a fleet in Arizona. Each Jetta will be operated for 195,000 miles, at which point their traction batteries will be tested before they are retired (their traction batteries are also tested when new). One-page vehicle maintenance logs are posted on nearby www pages. This information includes the date and mileage for all maintenance and repairs performed on the vehicles. The four 2013-2014 Volkswagen Jetta HEVs have been driven a total of 71,928 miles. The cumulative average fuel economy is 34.5 mpg. Monthly gasoline consumption for each vehicle is captured in the vehicle specific fact sheet on the AVTA web site. Note that all four vehicles were moved to a taxi service in July 2014.

2013-2014 Volkswagen Jetta HEV - Fuel Economy
