

2013 Honda Civic HEV Accelerated Testing - September 2014

Four model year 2013 Honda Civic hybrid electric vehicles (HEVs) entered Accelerated Testing - one during March 2013 and the other three during April 2013 in a fleet in Arizona. Each Civic will be operated for 195,000 miles, at which point their traction batteries will be tested before they are retired (their traction batteries are also tested when new). One-page vehicle maintenance logs are posted on nearby www pages. This information includes the date and mileage for all maintenance and repairs performed on the vehicles. The four 2013 Honda Civic HEVs have been driven a total of 322,492 miles. The cumulative average fuel economy is 39.7 mpg. Monthly gasoline consumption for each vehicle is captured in the vehicle specific fact sheet on the AVTA web site.
