**Subject:** Fracked Gas Pipeline

To: Department of Energy: I cannot make the upcoming hearings on Monday April 21, 2014, but I would like to make my opposition known to any new development of fracked gas, or other fossil fuels that damage our atmosphere, our waters, or our lands. We really need to do the opposite: phase out fossil fuels, rapidly development alternatives, invest in sustainable energy resources such as solar, thermal, wind, etc. We cannot simultaneously work against global climate change and build even more damaging technologies.

Thanks for listening,  
Bob Gardner
