

## 2013 Toyota Prius PHEV Accelerated Testing - September 2014

Four model year 2013 Toyota Prius plug-in hybrid electric vehicles (PHEVs) entered Accelerated Testing - one during March 2013 and the other three during April 2013 in a fleet in Arizona. Each Prius will be operated for 195,000 miles, at which point their traction batteries will be tested before they are retired (their traction batteries are also tested when new). One-page vehicle maintenance logs are posted on nearby www pages. This information includes the date and mileage for all maintenance and repairs performed on the vehicles. The four 2013 Toyota Prius PHEVs have been driven a total of 298,145 miles. The cumulative average fuel economy is 49.2 mpg and the cumulative average electricity consumption is 13.4 AC Wh/mile. Monthly gasoline and electricity consumption for each vehicle is captured in the vehicle specific fact sheet on the AVTA web site.
