

# LANDSCAPE OF LOCAL ENERGY PROGRAMS

Related programs are shown right mapped by **SCALE** and by **SECTOR**

**SCALE** is represented by the rings of the circle.

The smallest scale is the innermost circle - the largest scale is the outermost.

**SECTOR** is represented by color.

Each sector category is given one of three colors, shown below.

## Circular Graphic **SECTOR** Guide

### ENERGY SECTOR

Residential | Commercial | Industrial | Generation

The programs in green have a primary purpose to impact energy goals.

### SUSTAINABILITY SECTOR

Generation | Transportation

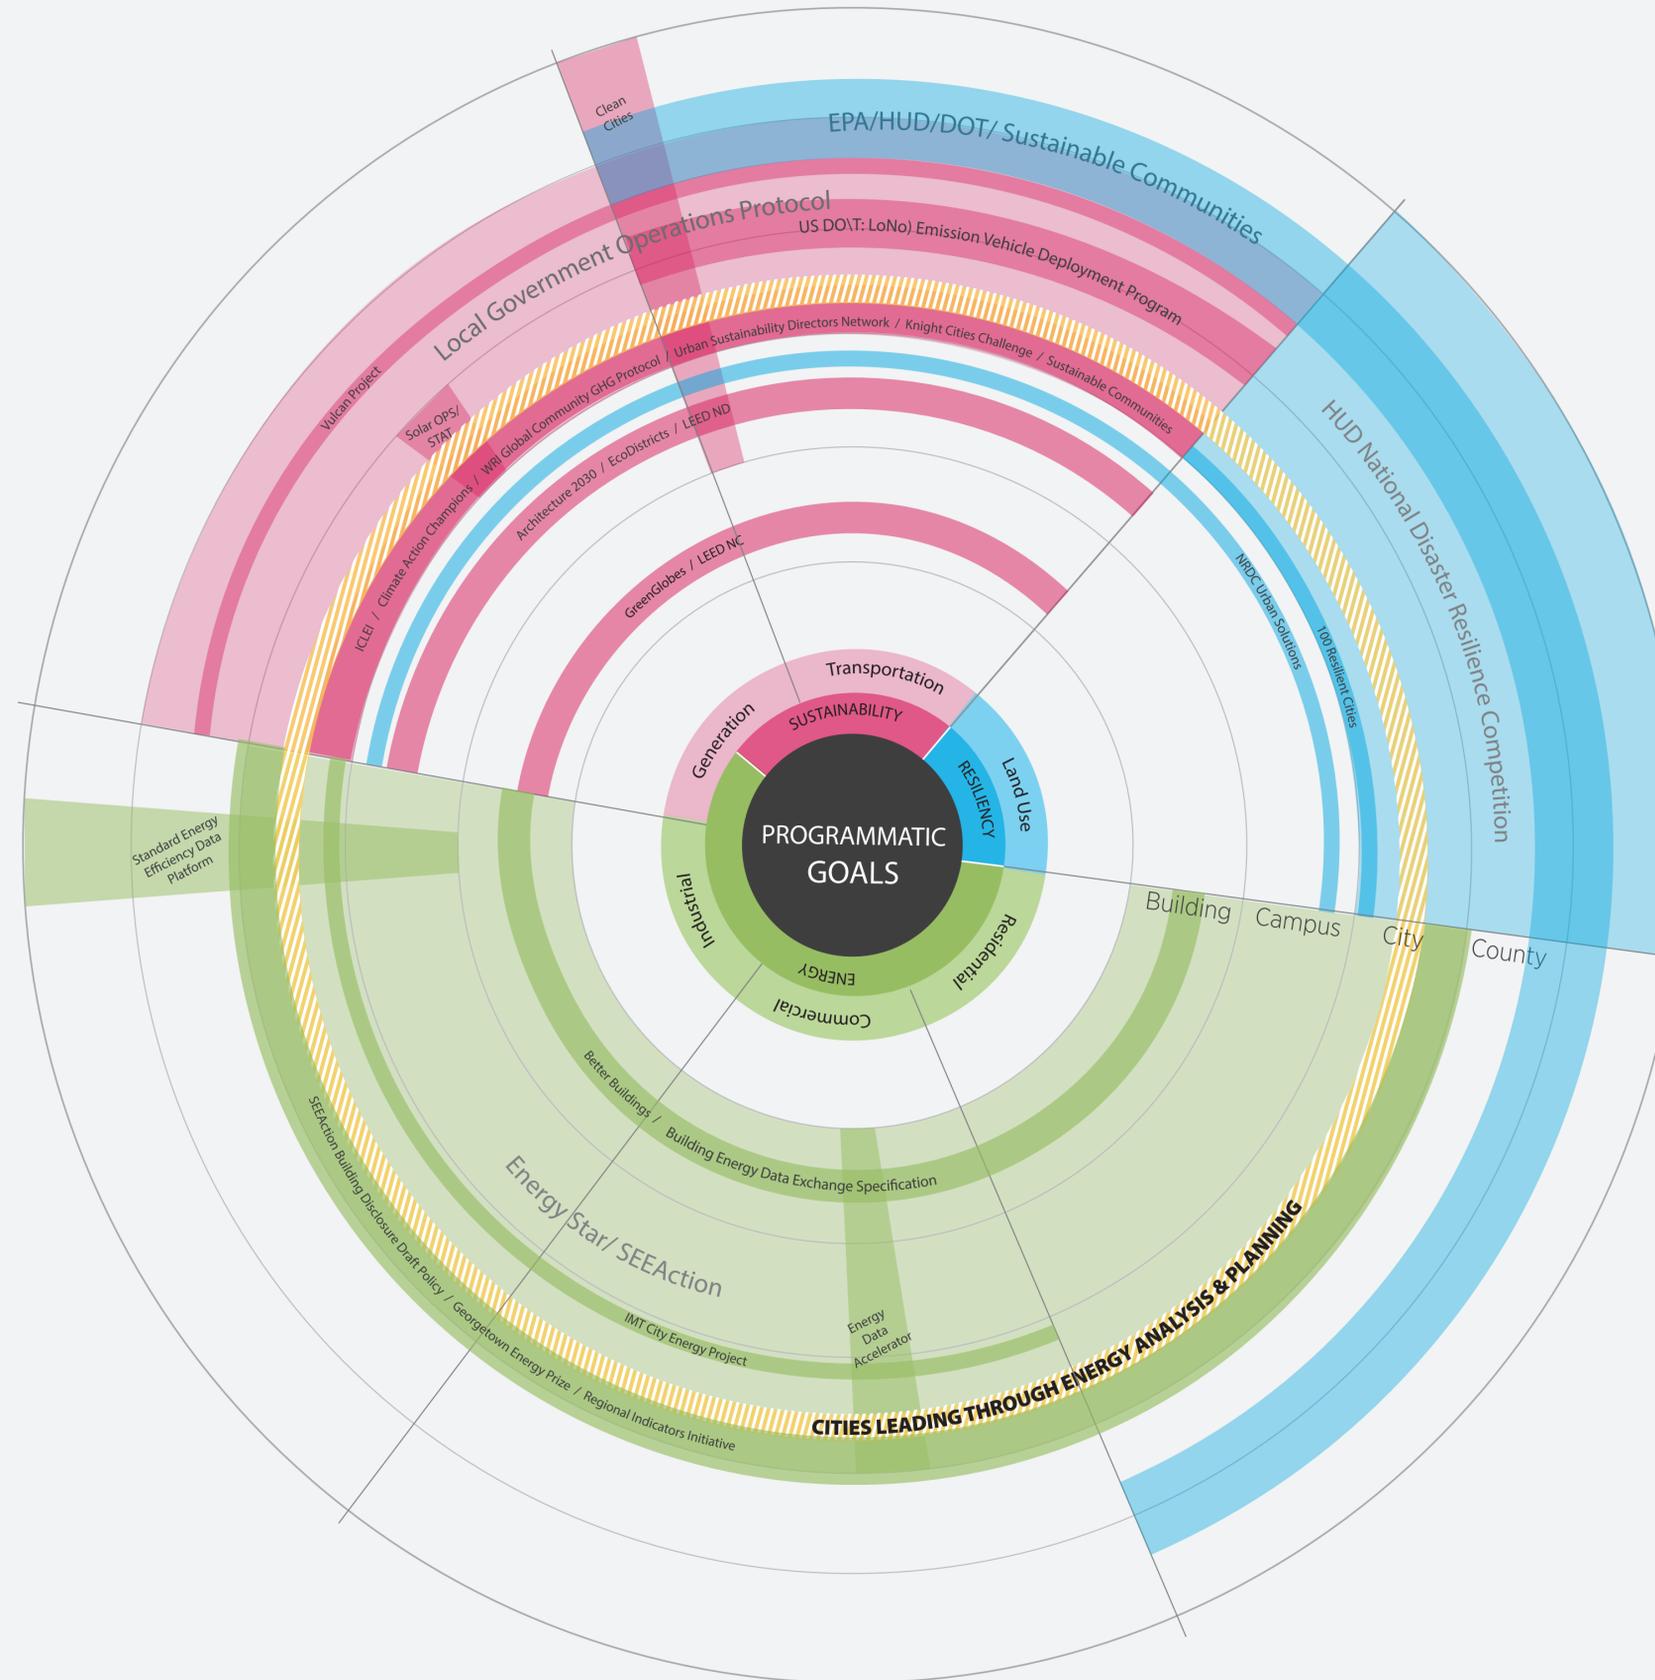

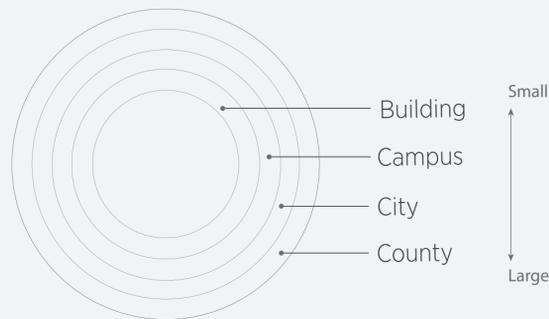

The programs in red have a primary purpose to impact sustainability goals.

### RESILIENCY SECTOR

Land Use

The programs in blue have a primary purpose to impact resiliency goals.

## Circular Graphic **SCALE** Guide

## Cities-LEAP PROJECT COVERAGE

### Cities-LEAP COVERS ALL SECTORS AT THE CITY LEVEL

Cities-LEAP is the only project that covers all goals across each sector in the city-level space. This is why it is the only project that goes 'full-circle'.

To the left is a comprehensive "map" of local energy programs. No single program provides global coverage, but each program stretches across both sector goals (Energy, Sustainability or Resiliency) and scale. The Cities-LEAP project is represented by a full-circle ring at the city level, because it is the only project providing full coverage across all sectors at that level.
