Subject: Plains and Eastern Transmission Line

Dr. Moniz,

As one of the landowners on Clean Line Energy Partner's proposed transmission line route I am asking you to extend the Public Comment period regarding the Non-NEPA Section 1222. The landowners are being asked to give up a huge portion of land for this monstrosity. For the rest of their lives and coming generations this line would traverse where they live, work and play. An extended comment period, public hearing with wide spread public notice is essential and respectful. It is a small token compared to what you are asking of us.

We do not agree that there is a need for this line. The face of renewables is changing rapidly with less intrusive and more locally generated power coming into play. These transmission lines will not only cost a small fortune to build, they will blight huge swaths of land and that is a natural resource we will never have any more of.

Thank-you for your time, we would appreciate a response.
