Organization: Mrs.

General Comment

Dear responsible parties at DOE. I am in Crawford County, Arkansas 4343 Bond Special Road. Based on previous correspondence unsolicited but sent to me by Clean Line, I believe the location of this line as planned will create a significant financial loss which will be greater than \$250,000. As I understand their correspondence, although difficult to tell from their map, the location of my home and property previously appraised at greater than \$600,000 lies within the "applicant proposed Route", however, probably just abuts the "representative right of way".

It appears the line's right of way extends right up to my property line about 200 ft from my house, however, may not actually cross on to it.

Regardless, the presense of this very large tower with the associated electromagnetic effects and permanent loss of aesthetics will easily forever change the value and resale potential of my property which consists of approximately 170 acres owned with an additional 60 leased on which I live.

My home is approximately 6,000 square feet and the ability to ever resale this home now sitting

in a very real way in the shadow of this line will be markedly and significantly reduced. The health and aesthetic problems both real and perceived by the public are quite large in magnitude. Given a choice, and people have a choice, I most certainly would not buy this home sitting next to this power line.

In reviewing the plan submitted in the revised and new application regarding acquisition of Right of Way and damages, it provides no guideline for compensation to land and homeowners such as myself who will have very real and large damages but don't happen to sit within the 200 ft right of way. To pretend that if you are not contained within a line extending 100 feet either side of this line means you have no damages is obviously subscribing to an illusion.

Please do not let this line go through with DOE and Southwestern Power participation without a clear and well defined plan for compensation to home and land owners such as my self. I do not have the ability to recover from the financial disaster you will visit upon me if this is approved.

My contact information below. I would be happy to visit on site with DOE.
