## Submitter Info

<b>Comment:</b>	I strongly object to the export of Liquefied Natural Gas due
-----------------	--

to the possibility of environmental damage, and risk to natural life. This is a brand new industry, one that is financially expensive and with high risk, the uncertainties alone should be enough to question the authorizations to export. However it seems the interests of the few that will benefit has out reached the risks, I again ask that you seriously consider the risks. \*🌐
