

## CR-091 Primary Basis of Cost Savings and Cost Savings Amount Custom Fields

### Primary Basis of Cost Savings and Cost Savings Amount Custom Fields Background

On August 29<sup>th</sup>, 2013 the PSWG approved Change Request 091 which adds two new custom fields to STRIPES.

The names of the fields are *Primary Basis of Cost Savings* and *Cost Saving Amount*. The purpose of these fields is to allow DOE to capture Cost Savings documented at time of award and the subsequent reporting capability of this data via IDW. The two new fields are labeled in IDW as *Primary Basis of Cost Savings* and *Cost Savings Amount*.

The new configurations will only apply to acquisition document types, specifically: BPA Calls, Contracts, Delivery Order/Task Order, Purchase Orders, Purchase Card Orders, and any modifications to any of these documents. The two new custom fields will appear on the Main | Additional Info screen of the acquisition documents. These will be configured as optional fields.

#### Two new fields added to acquisition award documents.

The following table describes the new fields:

New Field	Description	Comments
Primary Cost Saving	This field captures the seven cost saving areas. The seven Policy approved cost saving areas have been included in the selection list.	Not a required field. Only one value can be selected and it must be on the list. The default value is Not Applicable for new awards.
Cost Saving Amount	This field captures Cost Savings documented at time of award for new awards and modifications.	Not a required field. The default value is zero "0" for new awards.

***\*Please note that the values that are entered/selected in these fields will carry forward to future modifications; as a result, each modification should be updated with new values if appropriate.***
