REQUEST FOR DATA

Date issued: March 2, 2010

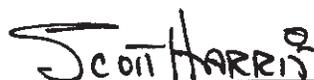

On October 22, 2009, the Department of Energy (DOE or the Department) received a complaint regarding Watermark Design's showerhead models SH-FAL70, SS-RH080, SS-RH500, and SS-RH600. The complaint alleges that testing of these models demonstrated that each model exceeds the Federal maximum water flow rate requirement. In addition, on January 21, 2010, the Watermark Designs web site (www.watermark-designs.com) advertised flow rates in excess of the Federal maximum water flow rate of 2.5 gpm on the following models: SS-RH075 (6.6 gpm), SS-RH080 (12 gpm), SS-RH400 (8 gpm), SS-RH500 (9 gpm), SS-RH600 (9 gpm), SS-RH700 (10 gpm), SH-FAL90 (10 gpm), SH-FAL50 (7.4 gpm), and SH-FAL70 (7.4 gpm). (Units are gallons per minute at 45 pounds per square inch.) Many other models, such as SH-SQ050, SH-603, SH-DLX, and SH-URB50, advertised flow rates of 2.5 gpm at 45 psi when the Federal test procedure requires the flow rate to be measured at 80 psi.

On February 25, 2010, Watermark Designs certified that all of the above models comply with the Federal maximum water flow rate when tested according to DOE test procedures.

Pursuant to 10 CFR § 430.62(d), the Department requests that Watermark Designs submit the test data underlying the certification of models SS-RH075, SS-RH080, SS-RH400, SS-RH500, SS-RH600, SS-RH700, SH-FAL50, SH-FAL70, SH-FAL90, SH-SQ050, SH-603, SH-DLX, and SH-URB50 to Laura Barhydt via email at Laura.Barhydt@hq.doe.gov, within 10 days of receipt of this letter. If you would like to meet with representatives of the Department to discuss the compliance of these models, please suggest a suitable date.

Companies are prohibited from distributing in commerce any covered product not in compliance with the applicable DOE energy conservation standard. Any person who knowingly violates this provision may be subject to fines of up to \$200 per violation, i.e., per product distributed in the United States. 42 U.S.C. § 6303.
