

memorandum

Idaho Operations Office

Date: February 1, 2010

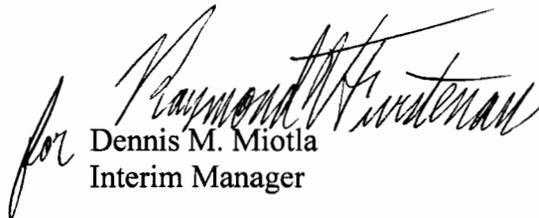

Subject: 2010 Annual National Environmental Policy Act Planning Summary (OS-ETSD-10-006)

To: Scott Blake Harris, General Counsel
DOE-HQ, GC-1/FORS

In accordance with DOE Order 451.1B, the Department of Energy, Idaho Operations Office (DOE-ID) is submitting its 2010 Annual National Environmental Policy Act (NEPA) Planning Summary. The 2010 Annual NEPA Planning Summary will be made available to the public as required by the Order. Estimated NEPA document costs are provided for actions that are well enough defined from a planning and budget perspective.

DOE-ID will complete a review of the Idaho National Laboratory portion (Volume 2) of the 1995 Final Programmatic Spent Nuclear Fuel and Idaho National Engineering and Environmental Laboratory Environmental Restoration and Waste Management Programs Environmental Impact Statement (1995 EIS). Since that review coincides with this year's annual NEPA planning summary requirement to include an evaluation of whether a site-wide environmental impact statement would facilitate future NEPA compliance efforts, DOE-ID has decided to wait until the review of the 1995 EIS is completed before determining whether a site-wide environmental impact statement would be useful.

If you have any questions concerning the attachment or the DOE-ID NEPA compliance program, please contact me or our NEPA Compliance Officer, Jack Depperschmidt, at (208) 526-5053.

for Dennis M. Miotla
Interim Manager

Attachment

Annual NEPA Planning Summary Environmental Assessments Expected to be Prepared in the Next 12 Months

Idaho Operations Office

Jan-10

*Title, Location	Estimated Cost	Estimated Schedule (*NEPA Milestones)		Description
Low-Level Radioactive Waste Disposition Project	\$100,000.00	Determination Date:	Mar-10	The proposed action would provide safe, compliant, and reliable disposal of Idaho National Laboratory remote-handled low-level waste.
		Transmittal to State:	TBD	
		EA Approval:		
		Decision		
Upgrade existing road corridors to improve an on-site transportation route between the Materials and Fuels Complex and other Idaho National Laboratory Site areas.	\$300,000.00	Determination Date:	Feb-10	The proposed upgraded road would establish a site transportation route for the out of commerce shipment of materials and wastes from MFC to other site areas to avoid Highway 20 road closures, improve safety, and reduce cost.
		Transmittal to State:	TBD	
		EA Approval:		
		Decision		
20 Megawatt Wind Farm	\$150,000.00	Determination Date:	TBD	The proposed action would install wind turbines on the Idaho National Laboratory Site to generate renewable energy for INL Site operations.
		Transmittal to State:		
		EA Approval:		
		Decision		
	Total Estimated Cost			
	\$550,000.00			

* Please include projected NEPA milestones, if planned.

Annual NEPA Planning Summary Environmental Impact Statements Expected to be Prepared in the Next 24 Months

Idaho Operations Office

Jan-10

*Title, Location	Estimated Cost	Estimated Schedule (*NEPA Milestones)		Description
No environmental impact statements are planned		Determination Date:		
		NOI:		
		Scoping:		
		Draft		
		Hearings		
		Final		
		ROD		
Supplement analysis of the 1995 DOE Programmatic Spent Nuclear Fuel Management and Idaho National Engineering Laboratory Environmental Restoration and Waste Management Programs Final Environmental Impact Statement	\$50,000.00	Supplement Analysis:		The supplement analysis will compare the impacts of projects in the 1995 EIS with updated plans and prevailing environmental conditions.
		Determination Date:	Feb-10	
		Approval:	Oct-10	
Supplement analysis for the Material Security and Consolidation Project	\$100,000.00	Supplement Analysis:		The proposed action is to modify an existing facility on the Idaho National Laboratory and transfer existing material already located on the Idaho National Laboratory into that facility.
		Determination Date:	Mar-10	
		Approval:	Dec-10	
	Total Estimated Cost			
	\$150,000.00			

preparing or proposes to prepare may impact the others organizations operations and, therefore, needs to be coordinated. DOE-ID has coordinated with NR/IBO.
